Thread: [REEDIFY #1 SHOPIFY CLOAKING | SELL ANYTHING WITHOUT BAN - REPLICAS - IPTV & MUCH MORE](#)

REEDIFY - March 27, 2026, 5:44 pm

Are your replica or other stores being shut down by Shopify ? Are you tired of going through a high-risk private payment service provider that takes at least 20% of your revenue? You've come to the right place!

Reedify is a SaaS platform that lets you run a clean, untouchable front store while silently redirecting all your checkouts to a hidden backend store — completely invisible to Shopify's review teams.

Here's how it works:

- Your customer lands on your front store ?
- They click checkout ?
- They get redirected to your backend store — seamlessly, automatically ?
- Shopify sees nothing. Your backend stays stealth. ?

Why dropshippers love Reedify:

- ? Full cloaking — your backend store is 100% hidden from Shopify
- ? Instant redirect — zero friction for the customer, smooth checkout every time
 - ? You can add multiple backends, meaning that if you want your first backend to be limited to €2000 of revenue, you can add a second backend, so that when €2000 is reached, it switches to the second one.
- ? Stay ban-proof — sell restricted, grey-market, or high-risk products without fear
- ? Plug & play — connect your stores in minutes, no coding needed
- ? Sell anything — supplements, replicas, restricted niches, you name it

Stop rebuilding stores every time you get banned. ?
Start running stealth with Reedify. ?

sorry can you explain more how this works? are payment still processed by shopify or something else?

REEDIFY - April 18, 2026, 11:18 pm

Hi bro, You're basically running a front store that customers see, and a separate backend store where the checkout actually happens.

When someone clicks checkout, they're redirected to the backend store, and that's where the payment is processed (Shopify Payments, Stripe, PayPal, etc. depending on your setup).

Customers arrive at your store (A) with branded items, for example, and at checkout they'll be redirected to a payment page on another Shopify store B (your second store's backend). This is how you bypass Shopify suspending your store for selling borderline products. So basically, you can sell whatever you want; there won't be any issues with store bans, etc. If you have any more questions, feel free to ask.
