HackerNoon Projects of the Week: Ravasend, polluSensWeb, and Nullmail

HackerNoon Projects of the Week spotlights projects that have proven their worth and usefulness. This week, we spotlight Ravasend, polluSensWeb, and Nullmail.

Null State - *March 30, 2026, 12:39 am*

Nullmail seems interesting just off of the fact it seems to be no-frills anonymous usage. However, it would be interesting to find out if they log device identifiers at all, as that sort of defeats the purpose in my opinion. Obviously it's good to not use your personal and/or work e-mail everywhere online, but still the anonymous part is the biggest part to me.
