? X (Twitter) API — Stop Scraping Like a Broke Kid

Still wasting time on: Dead scrapers that break every week?

Accounts getting banned for no reason?

Proxy farms + session garbage?

Yeah... been there.

? Here's the fix

Real API.

No scraping.

No browser emulation.

No babysitting scripts.

Just send a request -> get clean data.

? What you get Direct access to X data (profiles, tweets, search)

Structured JSON — no parsing trash

Fast responses — built for scale

No proxy headaches

No account farming

? Why it hits different? Pay only for what you use

? No monthly traps

? 10,000 FREE credits on signup

? Test everything before spending a cent

? Actually stable (not some patched scraper ?)

? Use it forCrypto alpha / whale tracking

Automation & bots

Lead scraping without scraping

Dashboards / SaaS tools

? Example

Code curl https://api.apitwitter.com/user?username=elonmusk \

-H "Authorization: Bearer YOUR_API_KEY"

No BS. Just works.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
