Thread: [Free stay in big and expensive cities](#)

mig4ng - March 29, 2026, 7:49 pm

Hello!

I've figured out a way of having free stay (sponsored by AirBnB ??<->) in big cities. This is quality houses.

In many European and South American cities, capitalism is buying houses in mass, and remodelling them to rent them at higher margins or making AirBnBs. This is a major problem that is raising rents in my country. Some others are building and doing the same or speculating prices. Many of these houses stay empty many days. Especially in lower seasons.

The way to stay at them for free is extremely simple, yet it's gray hat, borderline black hat depending on country. White hat in others.

With great power comes great responsibility!

I can sell this method for educational purposes only. You are responsible for your own actions. Be it for Hacktivism, malice or self interest. YOU ARE RESPONSIBLE.

Luckily and a lot thanks to God I'm doing great in life at the moment and can pay for these stays. I was a poor hacker in the past and did use black hat and gray hat to learn and profit.

One of the lessons I learned is that white hat hacking is the most fulfilling one. I love writing and fantasising about gray and black hacking still, nostalgic of the old days. Many times when I find a black or gray hat hacking opportunity I approach the owner or entity responsible for it and offer a fix for a price. In this case I don't know if I want to do so because it continues to raise cost of living in my country and it shows in friends and family that have troubles paying rent or buying an house.

Therefore, I cannot fix the problem morally. And I also cannot abuse it because I prefer white hacking.

Selling this guide/method for educational purposes.

Contact me here or via Telegram. Telegram username is the same as here.

First 3 get it for \$10 as long as you vouch your honest opinion here (without revealing the method). After that the price will be \$190.

I've been out of the forum for a while as you can see. I might come and write more hacking methods and guides because this forum taught me a lot since I was little and allowed me to learn to be a great hacker and infrastructure engineer with a keen touch on security. I want to inspire more blackhat and whitehat hackers to go back to the light side.

Warmly

Are you doing vouches? If you are I would love to review your work :)

I've decided to not sell this.
