Hackers - April 1, 2026, 5:38 am

In recent news...

Matt Gaetz says there is a hybrid race and we'd be surprised to know who is not exactly human. JD Vance says he's obsessed with UAP and thinks they are not aliens, but instead are demons. Pete Hegseth has reconfirmed the Pentagon and general gov's interest in UAP disclosure. Eric Burlison has made numerous statements and again has confirmed these objects defy all logic and human capabilities.

The list goes on. There are dozens of top-ranking Pentagon, Air Force, DOD, DOE and other US Gov officials (and many around the world too) that have come out to speak up about the phenomenon. It is neither new nor a conspiracy, and I hope many will take me and others seriously in the future.

TLDR:

My family and friends and I saw some shit in 2024-5, noticed the drone fleets picking up again a few months ago and I predicted we'd see chatter pick up soon. That has happened. From all facets of government, we are getting more and more statements and soft disclosure in the last couple of months.

More statements from the past:

Spoiler ([Click to View](#))

We have things flying over our military bases and places where we're conducting military exercises and we don't know what it is and it isn't ours...

— Marco Rubio

US Senator ®

7/16/2020 | Fox News

I think some of the phenomena we're seeing continues to be unexplained and might... constitute a different form of life.

— John Brennan

Director of the Central Intelligence Agency

12/16/2020 | Podcast

Usually we have multiple sensors picking up these things... There are a lot more sightings than have been made public... Objects that have been seen by Navy or Air Force pilots, or in satellite imagery, that engage in actions that... we don't have the technology for, or traveling at speeds that exceed the sound barrier without a sonic boom... Technologies that we don't have and, frankly, that we are not capable of defending against.

— John Ratcliffe

Director National Intelligence

3/22/2021 | Fox News

So it's not us, that's one thing we know. I could say that with very high degree of confidence in part

because of the positions I held in the department...

— Christopher Mellon

Dep. Asst. Secretary of Defense for Intelligence

5/16/2021 | 60 Minutes

There is footage and records of objects in the skies. We don't know exactly what they are. We can't explain how they moved, their trajectory. They did not have an easily explainable pattern.

— Barack Obama

US President (D)

5/19/2021 | Late Late Show with James Corden

I don't know what it is, but any time you have legitimate pilots describing something that doesn't seem to conform to the laws of physics that govern aviation and is in US airspace, I think it's something we need to get to the bottom of... If there is a foreign government that had these kinds of capabilities, I think we would see other indications of advanced technology. I can't imagine that what has been described or shown in some of the videos belongs to any government that I'm aware of... I have no idea what it is but I think we should figure it out.

— Martin Heinrich

US Senator (D)

5/21/21 | TMZ

There are things flying around out there that we haven't fully identified yet.

— Bill Clinton

US President (D)

6/8/2021 | Live with Kelly and Mark

That leaves aliens, which we presume it probably is. Although I don't wanna go too far here.

— Ben Rhodes

Deputy National Security Adviser

6/30/2021 | Podcast

We were able to identify one reported UAP with high confidence. In that case, we identified the object as a large, deflating balloon. The other [143] remain unexplained... Most of the UAP reported probably do represent physical objects given that a majority of UAP were registered across multiple sensors, to include radar, infrared, electro-optical, weapon seekers, and visual observation.

We currently lack data to indicate any UAP are part of a foreign collection program or indicative of a major technological advancement by a potential adversary... Some UAP observations could be attributable to developments and classified programs by U.S. entities. We were unable to confirm, however, that these systems accounted for any of the [144] UAP reports we collected.

— Office of the Director of National Intelligence

Preliminary Assessment: Unidentified Aerial Phenomena 2021

6/25/2021 | Report to Congress

Well I don't believe they are coming from foreign adversaries. Why if there were that would suggest they have a technology that is in a whole different sphere than anything we understand, and frankly China and Russia just aren't there, and neither are we by the way...

— Mitt Romney

US Senator ®

Former Presidential Nominee

6/27/2021 | CNN

We hope it's not an adversary here on Earth that has that kind of technology. But it's something.

— Bill Nelson
NASA Administrator
10/19/2021 | UVA Center for Politics

There's always the question of 'is there something else that we simply do not understand, that might come extraterrestrially?'

— Avril Haines
Director of National Intelligence
11/16/2021 | Washington Post

It's clear that the majority, that many of the observations that we have are physical objects from the sensor data... We haven't had a collision. We have had at least 11 near misses.

— Scott Bray
Deputy Director Navy Intelligence
5/17/2022 | Congressional hearings

There are so many of us now on the intel committee and armed services that we're going to stand by the service members who documented this stuff. They have video. They have radar. They have heat sensors. They have everything.

— Kirsten Gillibrand
US Senator (D)
Committee on Armed Services
8/26/2022 | Twitter

UAP continue to represent a hazard to flight safety and pose a possible adversary collection threat. Since the publication of the ODNI preliminary assessment in June 2021, UAP reporting has increased, partially due to a concentrated effort to destigmatize the topic of UAP and instead recognize the potential risks that it poses as both a safety of flight hazard and potential adversarial activity. Whereas there were previously 144 UAP reports covered during the 17 years of UAP reporting included in the ODNI preliminary assessment on UAP, there have been 247 more UAP reports during the 17 months since.

— Office of the Director of National Intelligence
2022 Annual Report on Unidentified Aerial Phenomena
1/12/2023 | Report to Congress

Objects that demonstrate technologies that seem to defy the law of physics & capabilities that we don't have as the world's superpower... I can't talk to you about any potential alien life, so I'll just leave it at that

— John Ratcliffe
Director National Intelligence
1/15/2023 | Fox and Friends

Advanced objects demonstrating advanced technology are routinely flying over our restricted or sensitive airspace posing a risk to both flight safety & national security.

— Marco Rubio
US Senator ®
2/28/2023 | Twitter

In the coming days, I will launch Americans for Safe Aerospace (ASA), a new advocacy organization for aerospace safety and national security. ASA will support pilots and other aerospace professionals who are reporting UAP. Our goal is to demand more disclosure from our public officials about this significant safety and national security problem... If the phenomena I witnessed with my own eyes turns out to be foreign drones, they pose an urgent threat to national security and

airspace safety. If they are something else, it must be a scientific priority to find out.

— Ryan Graves

Founder, Americans for Safe Aerospace

Former F/A-18 pilot

2/28/2023 | Politico

We see these ['metallic orbs'] all over the world, and we see these making very interesting apparent maneuvers.

— Dr. Sean Kirkpatrick

Director, All-domain Anomaly Resolution Office

5/31/2023 | NASA IST Briefing

I can tell you that advanced UAP are a national security and an aviation safety problem. It has been more than a decade since my squadron began witnessing advanced UAP demonstrating complex maneuvers on a regular basis, and we still don't have answers. I founded Americans for Safe Aerospace to create a center of support, research, and public education for aircrew impacted by UAP encounters... Today, I would like to center our discussion around three critical issues that demand our immediate attention and concerted action... As we convene here, UAP are in our airspace, but they are grossly underreported... The stigma attached to UAP is real and powerful and challenges national security... The government knows more about UAP than shared publicly, and excessive classification practices keep crucial information hidden.

— Ryan Graves

Founder, Americans for Safe Aerospace

Former F/A-18 pilot

7/26/23 | Testimony to Congress

In 2019, the UAPTF director tasked me to identify all Special Access Programs & Controlled Access Programs (SAPs/CAPs) we needed to satisfy our congressionally mandated mission. At the time, due to my extensive executive-level intelligence support duties, I was cleared to literally all relevant compartments and in a position of extreme trust in both my military and civilian capacities. I was informed, in the course of my official duties, of a multi decade UAP crash retrieval and reverse engineering program to which I was denied access to those additional read-on's. I made the decision based on the data I collected, to report this information to my superiors and multiple Inspectors General, and in effect become a whistleblower.

— David Grusch

National Geospatial Intelligence Agency Officer

7/26/23 | Testimony to Congress

There is a lot of unidentified aerial phenomena out there. That's true. And they've got pilot reports, there's various other sensors out there, and some of it is difficult to explain... some [UAP are] really kind of weird and unexplainable

— Gen. Mark Milley

Chairman Joint Chiefs of Staff

8/6/2023 | Washington Times

I have met with pilots...they are not conspiratorial, they are not crazy, and they tell me stories that they've seen things that you wouldn't believe. Am I a believer? No, I can't say I am. But I have met with people, serious people, that say there are some really strange things flying around out there.

— Donald Trump

US President ®

6/14/2024 | Podcast

You need a 24/7 declassification office... What the Deep State uses the most to cover up their

corruption is an illegal application of the classification system.

— Kash Patel

FBI Director

9/2/2024 | Shawn Ryan Show

There are things that cannot be explained... I don't know what the explanation is for those unexplainable things, but I will say there are phenomena that have been witnessed by multiple people that are just inexplicable by any kind of science, the science available to us.

— Gen. H.R. McMaster

National Security Advisor, Lt. General

9/6/2024 | Bill Maher

We have people at very high clearances, both today and in the past, who did really important work for our government, who continue to do important work for the government, who have come forward with some claims about the US having in the past recovered exotic materials and the reverse engineered those materials to make advances in our own defenses and technologies... One of two things is happening here. Either they are telling the truth, and that is something that would obviously be the biggest story in human history, or we have people in really important positions in government who are crazy, who are making up stories, and who are still in positions of importance.

— Marco Rubio

US Senator ®

9/15/2024 | Fox News

There are interesting cases that I — with my physics and engineering background and time in the [intelligence community] — I do not understand and I don't know anybody else who understands,

— Jon Kosloski

Director, All-domain Anomaly Resolution Office

That's probably true for many things, but it doesn't explain what we saw in the sky. I'm not relying on the news or reports for my own opinions on this, that's all just supplemental. We witnessed flying objects that seemingly were able to generate a cloud around them, fly faster than any space ship, missile, or jet without making a noise, and stop on a dime which completely breaks our understanding of physics / acceleration / deceleration / gravity.

I can't rule out that the gov has a program they want people to believe are aliens. Project blue beam & all that is very possible.

But what I can't do is just forget what we saw, and tbh, what thousands of people have seen (if not more).

For me though, it's not an aliens-only topic, it's an energy topic. If the gov has the energy systems

and propulsion breakthroughs to pretend to be spacefaring aliens, then more power to them. The main focus should be on the energy & physics of the craft, because that's revolutionary for mankind regardless of who made/makes it.

For me, a UAP or UFO is an unidentified flying object or aerial phenomenon, which could just mean the Australians are fast, or the Nigerians are quicker. There's no way to say really, so I try not to make any conclusions.

We saw fast things that would take humans into a new era of travel & energy, regardless of who/what/why. So if it's gov, that's fine... as long as the technology is not hidden away and ridiculed as a conspiracy like it has been in the past. The topic of energy & propulsion is more important imo than figuring out the reasons for it all.
