Thread: [Darksword Code in response to apple shitting themself](#)

Biggy_Asian - April 1, 2026, 3:46 pm

Target: iOS 18.4–18.6 on iPhone XS through iPhone 11 Pro Max (A12–A13 chips), across dozens of specific device/build combinations.

0 Pre-compiled binaries, I dont recommend using this on any sort of device, its like 30k+ lines of code. Russian code is sloppy.

<https://gofile.io/d/5n4dbN>

Was posted on github, if i had the github id share it but my friend sent me it. i am just now finding out most of this info through LowLevelTV's video on this situation.

Have the git? Send it and ill add it here.

bayleewalsh6 - May 27, 2026, 1:40 pm

need darksword access

Hackers - May 27, 2026, 1:56 pm

I found some references to this...

<https://github.com/htimesnine/DarkSword-RCE>
<https://github.com/opa334/darksword-kexploit>

Based on this article:

<https://cloud.google.com/blog/topics/threat-intelligence/darksword-ios-exploit-chain>

Is DarkSword available for iOS 26? I need it too—I'm willing to pay.
