Thread: [Looking for a job \(Developer + AI Expert + Automations Builder \)](#)

xyzabc - April 2, 2026, 12:13 pm

I am looking for a job where I can use my skills and quickly make some consistent money to keep everything in order. I believe my skills as mentioned below would be extremely helpful to some people here in their work. I have around 10 years of development experience across various technologies and business uses.

I have Strong interest in AI, backend systems, and high-performance applications.

Skills

JavaScript / Node.js
Automation (Playwright, scripting)
Backend Development (APIs, server architecture)
AI Tools & Workflows
Basic Frontend (HTML, UI integration)

Experience

Built automated systems for scraping, data processing, and workflow optimization
Developed backend APIs and matchmaking systems for real-time applications
Created modular video automation pipelines using AI tools

Projects

Automated video generation system (AI-based)
Game server matchmaking API
Web automation tools for large-scale data extraction

DM me or post below if you have any relevant work for me.
