Thread: [Valkyrie Stealer Panel - Blockchain C2](#)

Lawxsz - April 10, 2026, 4:19 am

Valkyrie — A Rust-native, post-exploitation framework built on decentralized log ingestion and blockchain C2.

??
>> No Domains. No Geo-blocks. Immutable Infrastructure. <<
??

Most stealers fail at the infrastructure level. Valkyrie doesn't.
Built around a decentralized log ingestion system with blockchain-anchored C2 nodes. Domains get seized? Servers geolocated? Irrelevant. Your command layer remains operational.

??
? Core Technology
??

- * 100% Rust — Memory-safe, minimal overhead, low detection surface. Native Windows execution.
- * ABE bypass — Extracts credentials from browsers & Discord even with Application Bound Encryption enforced.
- * Crypter-agnostic — Fully compatible with external crypters. Bring your own obfuscation.
- * Loader recommended — For maximum effectiveness and extended campaign longevity.

??
? Data Recovery — Categorized
??

? Authentication & Sessions
Passwords | Cookies | Autofill | Cards | Browser profiles | Discord tokens/accounts | Google tokens

? Wallets & Financials
Crypto wallets (browser/extensions) | FTP/SSH/RDP/VPN credentials

? Cloud & DevOps
AWS/Azure/GCloud creds | GitHub tokens | Postman | DBeaver | env sensitive files

? Messaging & Artifacts
Telegram (session + artifacts) | WhatsApp | Signal | Discord

? Local Security & Databases
KeePass | Bitwarden | Installed apps | Running processes | File stealer (secrets)

? System Intelligence
History | Bookmarks | System info

??
? Panel & Management — Operator-first

??

- * Multi-language UI — English, Russian, Chinese
- * Tabbed log inspector with advanced filters and search engine
- * Professional log exporter — structured, forensics-ready
- * "Worker" role system — Create sub-users with scoped panel access and individual statistics
- * Real-time notifications — Telegram / Discord webhook integration

??

? Infrastructure — The Real Differentiation

??

- ? Decentralized log ingestion — Multiple independent servers. No single point of failure.
- ? No geolocation blocks — We accept logs from any country. No filtering, no policy-based dropping.
- ? Blockchain-backed C2 — Command layer resistant to domain seizures, DNS takedowns, and hosting bans.

??

? Roadmap

??

- > Remote C2 with process injection (in development)
- > DLL sideloading — Coming soon for enterprise clients seeking deeper execution vectors

??

? Licensing & Access

??

- \$ \$250 — 3 months of use
- \$ Vouch copies available — Limited slots for trusted community members

??

Valkyrie is live. Infrastructure-first. Imparable.

looks impressive GLWF

socks4 - April 10, 2026, 6:11 am
Does the blockchain work by querying live rpc nodes, or by using websites api to view new server location

NotJinx - April 10, 2026, 12:05 pm
Looks good, GLWF.

These and other methods allow us to operate 24/7

TEKNIX187 - April 11, 2026, 4:56 am

This looks AMAZING! GLWS

PM me if vouch copy available.

Freakasod - April 11, 2026, 9:41 am

Lawasz is a scammer. He sold Prysmax Stealers last year, but I never received them.

wunschwetter - April 11, 2026, 1:46 pm

Be careful to buy this. The seller never made any programs which works full well. Prysmax he sold also never once worked fully. This so called new stealer also will not work. Do not waste your money on this. AVOID

Lawxsz - April 22, 2026, 12:49 pm

? loading encrypted image...

We have 100kb files and sideloading technology for distribution with valid signed certificates! We also provide voucher copies. btw old prysmax users have access

Lawxsz - May 5, 2026, 8:18 pm

? loading encrypted image...

New Valkyrie Stealer .JAR loader

Being able to combine real Mods and undetectably run Valkyrie
Fabric/Forge/JAR Universal support

? loading encrypted image...

Lawxsz - May 28, 2026, 12:16 pm

Loot Explorer Function to search in to Logs and Filter Results \ Exports

? loading encrypted image...

Topia - September 6, 2026, 9:54 am

That is crazy, but am i the only one that have the site giving me error, i can't access it (might be undergoing maintenance)

ViperPrivacy - September 7, 2026, 12:17 am

with hosting or without?

if no what is the better hosting for this tool
