First Official ARG - Fragment
VIBE X BROTHERHOOD

Credits to [Hackers](#) for reviewing and helping me create it.

What is this ?

This is a contest, close to CTF`s an ARG (Alternate Reality Game)

Information is not given directly.

It is hidden, fragmented, and distributed.

This one will be the easiest but we still encourage everyone to do this in groups, especially for the next to come! I would love to hear how this experience went.

Your task is not just to find answers

but to recognize patterns and connect fragments.

How it Works:

- Info is not in plain sight
- Data can be encrypted
- Check EVERYTHING
- Hints may be given out under special circumstances

If something feels out of place, it probably isn't.

The final answer needs to be put in a spot you may encounter on your search.

RULES:

- Whitehat only
- Everything needed is accessible

- Think before you try something

First of all I greatly appreciate all the people who are trying and entering the ARG! It was a very fun experience for me and I am very happy with the feedback i have gotten so far, but as many people currently are stuck with a point I want to help you all out with 1 hint! If you dont want to win this with a hint, dont click the spoiler below.

Spoiler ([Click to View](#)) regarding a place you have looked for amidst the city of darkness, Some things are easier to hear than to see.

I have got quite far into this and got stumped would love to team up with some members let me know.

Hey everyone, I would like to bump this thread once more, we have encountered an issue, which resulted in people not finding a clue in this.

I am very sorry for this inconvenience, I know for a fact how hard some people here tried, I will give off a hint what we have changed for this to finally work now.

For anyone still interested in the ARG, here is the puzzle for the change:

The Beeping sounds of a long gone empire have shuffled the debry aside and out came the shining new clue to fix it all.

Glad I wasn't going crazy! Any one wants to team up on this send me a convo. [bl1ndm0nk](#) let me know we made a good team on this.

I am glad you like it, there may be the word null somewhere, unsure if i made many cross references to it xD

Maybe you will finish it soon with some people here.

Would someone like to team up with me on this? I think it has something to do with crypto, maybe a seed phrase? Clearly has a type '.... Or am I thinking too far into this, perhaps I'm ahead of myself or just too tired to dig this deep. '..... I see the clever nods! '..

CL1B - July 7, 2026, 3:05 am

Wow cool!
