Thread: [BrandForge — I Build Your Vision Daily. Apps, Web, AI, Design. Starting \\$1,000](#)

Mxstermind - April 12, 2026, 8:35 am

BRANDFORGE Your Daily Builder. Full-Stack Apps · AI · Web · Design
I turn ideas into working, deployed, good-looking software. Fast.

WHO I AM

I vibe code full products into existence using AI + real engineering.

Not mockups. Not templates. Not "I'll figure it out."
Working, deployed, good-looking software — fast.

I built brandforge.gg solo. From nothing.

Auth system, marketplace, deal rooms, contracts, leaderboard economy, privilege store, Stripe + crypto payments, realtime chat, Cloudflare deployment — all of it. One person. That's the proof.

WHAT I OFFER

Full-stack web applications
Mobile-ready platforms
AI agent integrations
Custom dashboards and admin panels
Marketplaces and SaaS tools
Automation workflows
UI/UX design + build — no handoff needed
Research and competitive analysis
Rapid prototyping -> production

You bring the idea. I bring it to life. Daily work, real output, no ghosting.

HOW IT WORKS

01 Tell me what you want to build
Drop your idea in DMs. No pitch deck needed.

02 We scope and agree
Price, timeline, deliverables. Clear before anything starts.

03 I build daily and show progress
You see it coming together. No black box.

04 Delivered and deployed
Working product, handed over. Done.

WHAT I CAN BUILD

SaaS platforms — auth, billing, dashboard, API

Marketplace apps — listings, bids, payments, chat
AI-powered tools — agents, research systems, content automation
Internal business tools and workflow automation
Landing pages that actually convert
Full product from idea -> deployed URL

WHY THIS IS DIFFERENT

Most devs take 3 months to ship what I deliver in a week.

I move fast because I use every tool available — AI, modern frameworks, battle-tested stacks. But I'm not just prompting and praying. I understand what's being built. I review every output. I fix what breaks. I make it look good and work correctly.

You've seen AI slop. This isn't that.

PROOF OF WORK

I built this solo:

brandforge.gg — live marketplace + deal OS
Full auth system — magic link, OAuth, JWT, RLS
Real-time deal rooms with contract embeds inside chat
Dual currency economy — Honor, Conquest, season leaderboard
Stripe + NOWPayments crypto integration
Cloudflare deployment, Supabase backend, full RLS policies

Go look at it. That's the resume.

PRICING

Starting at \$1,000

Price depends on scope. Simple tools start lower. Full platforms scale up. We agree on everything before a single line is written.

Payment: crypto preferred. Escrow available on request.

CONTACT

DM me here on HF

Or reach me through the platform I built:

brandforge.gg

Come with your idea. Leave with a product.

Solo. Fast. Accountable. No BS.
