Thread: [\[Partnership\] Full-Stack Vibe Coder Looking for an Idea Person](#)

Oppa - April 12, 2026, 5:25 pm

What's up everyone,

I'm looking for a partner who's got a solid project idea and wants to team up to actually build it. I'm the dev side of the equation I need someone who brings the vision, the direction, and ideally some hustle on the non-code side (marketing, community, design, whatever your strength is).

What I bring to the table:

I can vibe code pretty much anything in Python and beyond. Discord bots, web apps, automation tools, APIs, scrapers, SaaS dashboards if it can be coded, I can make it happen. I work fast, I iterate fast, and I don't ghost.

What I'm looking for in a partner:

Someone with a real idea they're passionate about not just "let's make money somehow." You should have a clear concept, or at least a strong direction, and be willing to put in work on your end too. This is a 50/50 thing, not a "build my idea for free" thing.

Ideal project types (but open to anything):

Discord bots (utility, moderation, community tools), SaaS tools, automation platforms, web apps, or anything interesting that solves a real problem.

How to reach out:

Drop a reply here with your idea or DM me. Let's talk it through and see if we click. Serious inquiries only let's actually ship something.

Looking forward to hearing what you've got.

C00Lssh - April 12, 2026, 5:54 pm

Hey Bud,

Im looking for someone to join in on my C00l Scanner project.

Shoot me a PM
