Thread: [Computer addiction & hacking/gaming](#)

The Truman Show - April 14, 2026, 8:55 am

Were any of you hooked on computers from a young age, totally?

I'm 30, I got a PC when I was 10, I dropped out of school at 14, and since then, I've spent 99.9% of my life on my computer.

I failed at hacking. And still do. Because I have no friends/communication/motivation/sanity.

I once hacked 40 BTC and gave 20 to my partner. It was no big deal at the time, even though I had no money, BTC was only worth £150 each at the time. I made £3000 myself.

I don't beat myself up about selling/giving away "my" BTC. But I sometimes question why my life has been so shit, while not realising it's shit at all!

Back to the point; 99.9% of my life on my computer, only gaming, attempting blackhat activities just to get enough so I can "ESCAPE" the reality/environment/loneliness that I have been in.

I never have.

For the last 10 years I've been entirely on my own, with no real/true communication with a single human.

I have achieved more than most humans. For most humans. Though because I am so "Pure" and "Out-of-the-world" (not being in it my entire life) -- I fear that despite my total pure-true-blessed-thoughtful-educational-inspiring heart is going to be betrayed, simply because the governments can't allow humans to perceive truth, and compare truth (me) to them (demons).

I don't want to be on my computer anymore. I never really did; I played Habbo Hotel where I thought I was socialising. I've never had any friends, nor seen the world, or had any "real" experiences.

I am the best person in the world. I deserve better than this. I'm not a criminal celebrity/paedophile/killer. I'm not a politician. I'm a REAL person. When will someone respect me as that, and speak the truth to me for the first time?

Spoiler ([Click to View](#)) It's nice loving people, when, obviously, we feel our own love, loving them. But just to make it clear, I know you can't judge/feel/perceive me in a way you know I would be comfortable with. But don't think I can't forgive you just because I don't want to be friends with you/be sexual with you in this life. I pray that people come to respect me, and understand, when you know you're doing that, that's clearly, evidently, blessedly, the best thing you can do in this world. I am the best person in the world. If you know me, you know why, and whether or not you want to, you agree, because you know truth, and you know that real truth is a hard thing to come by in this world, and since my witnesses have; they are blessed. But supporting Justin Bieber/celebrities/governments in being against me, in the pathetic ways you are showing yourselves to be, is sad. I am the best person in the world. Why did I say that?

If you believe in God, I'm speaking to the nerds of HF, and hackers alike; if you believe in God, know; the most important truth we can have, and know, and what anyone else can know, wirelessly, is the truth of the purity of our hearts. This is what will bless us, nothing else. I have provided the best/true information of this world in modern history.

Can you sell Ebooks here?

Demons, fellow humans, CHOOSE "Understanding" -- don't let "understanding" choose YOU!

You have been unaware all your lives, and were making mistakes, as impure humans. Come to terms with that.

Impurities, to God's people, ARE the Devil. Hallelujah!

I recently tried gambling for the first time. I deposited like £100 or some shit in total, lost it all.

Did have some fun wins though. But yeah, gambling is certainly not good, I deem it of the Devil. I think a lot of people can relate to this.

I gambled on a game back when I was younger, but fkd at -- I get depressed when I lose. D:

RIGGED!

Undead - April 14, 2026, 12:51 pm

Yeah, I've spent most of my life on the computer as well or playing games. You're still young though so just take a break from technology and spend some time outside in nature.

I like the choice of your username as well. We are literally living in the Truman show but not many can see through it.

Lol that's why I only gamble with bytes on here. Less stress if I lose...
