Thread: [JINX AI | Breach the Limits: Claude | Easy .EXE Setup | \\$10](#)

NotJinx - April 14, 2026, 3:17 pm

? JINX | AI ?

— "Why play by the rules when you can rewrite them?" —

Quote:? UNLEASH AI MODELS ?

JINX AI is the ultimate all-in-one bridge.

Zero configuration. Zero rate limits. Pure coding mayhem.

? TECHNICAL SPECS ?

? PLUG & PLAY No Python, No Node, No mess. Just run the .exe and code. ? EXT. SUPPORT Full compatibility with Claude Code CLI & VS Code. ? BYPASS MODE Proprietary routing to dodge those annoying rate limits. ? STEALTH Clean headers and secure proxying for your dev environment.

PRICE: \$10.00 / Month

? VOUCH COPIES: [0/5]

Offering 5 review copies to High-Reputation members only to verify functionality. Post below!

? INITIALIZE BREACH? ?

1. Start an HF Contract | 2. Send me a PM for details | 3. Receive the Payload

[contract=tid]Start Contract[/contract]

All deals MUST be conducted via HF Contracts.

Horus God - April 14, 2026, 4:52 pm

can you explain a bit what it does ? so it basically remove free limit of your free account ?

NotJinx - April 14, 2026, 5:10 pm

(Apr 14, 2026 04:52 PM)Horus God Wrote: [\[CITE\]](#) can you explain a bit what it does ? so it basically remove free limit of your free account ?

No, i offer you an exe for the api.

Horus God - April 14, 2026, 5:23 pm

(Apr 14, 2026 05:10 PM)NotJinx Wrote: [\[CITE\]](#) No, i offer you an exe for the api. i dont understand can you explain what it does exactly ?

DramaKing - April 14, 2026, 6:19 pm

If I get this right, you abuse the Claude API specifically for Sonnet with some kind of insecure authentication and authorization.

Money- - April 14, 2026, 6:37 pm

(Apr 14, 2026 05:23 PM)Horus God Wrote: [\[CITE\]](#) i dont understand can you explain what it does exactly ?

He will give you an executable file that will interact or access that API instead of giving u the direct source.

Give you a middle man tool to access whatever exploit he has than direct giving you the source.

Something like that.

NotJinx - April 14, 2026, 10:48 pm

I'm offering Vouch Copies for high-rep members precisely so they can verify it's clean and works exactly as advertised.

? Jinx AI — USAGE TAB ?

--- WHAT'S NEW? ---

Usage Tab

- USAGE TAB: Added a Usage Tab where you can see Token Usage and Cost Savings.

Voidlight - April 15, 2026, 2:02 pm

Why does it have to be an exe and not just an api key and api endpoint?

NotJinx - April 15, 2026, 2:18 pm

(Apr 15, 2026 02:02 PM)Voidlight Wrote: [\[CITE\]](#) Why does it have to be an exe and not just an api key and api endpoint?

Because I'm selling a workflow, not just a string of text. A raw API key is a headache

? Zero-Config Automation: Setting up a manual bridge requires messing with local servers, environment variables, and complex header configurations.

My .exe does all that heavy lifting in one click. Your time is worth more than \$5.

? Session Persistence: The .exe handles background "handshakes" and token refreshes automatically so your coding session never drops. No manual re-authentication needed.

? Smart Bridge Logic: The executable acts as an intelligent relay, reformatting your requests on the fly to ensure compatibility with Claude Code and VS Code.

? Plug & Play GUI: Most people want to code, not spend an hour acting as a sysadmin. Clean interface, license management, instant connectivity.

dheebak - April 16, 2026, 7:20 am

So this EXE will literally remove all the limits right? infinite coding ? or is it just stop on weekly limits ? do you also have any for MAC?

NotJinx - April 17, 2026, 2:51 pm

sure i'll give it a shot and report back

kopfness22 - April 17, 2026, 4:30 pm

I received a test version of Jinx AI and it worked very well. I had a small problem at first, but the developer was able to help me.

The setup is simple and well explained.

? loading encrypted image...

After some time of intensive coding, I reached a limit of 19 million input tokens, I think, but it only took 3 minutes to reset.

? loading encrypted image...

I hope that more models will be added soon, perhaps Sonnet 4.6 or even Opus.

I can recommend this product if you have somewhat complex coding tasks and a clear end goal.

? Jinx AI — MAJOR UPDATE ?

--- WHAT'S NEW? ---

? 15+ New Models Added

We've significantly expanded our model library. You now have access to the latest frontier models:

- Claude Series: Sonnet 4.6, 4.5, 4.0 | Opus 4.6 | Haiku 4.5 (+ Agentic modes)
- Gemini Series: 3.1 Pro | 3 Flash
- Advanced Architecture: gpt-oss-120b, DeepSeek 3.2, GLM-5, Qwen3 Coder Next, MiniMax (M2.5/M2.1)

? UX & Productivity Overhaul

- New Chat Tab & Modes: Redesigned interface for a cleaner, faster workflow.
- Enhanced Usage Tab: Track your Token Usage and Cost Savings with precision.
- Export Data: Easily export your stats to CSV and JSON formats.
- UI Polish: Smoother animations and refined layout for improved readability.

? Pro-Workflow Features

- Multi-Profile System: Manage multiple Kiro/Antigravity accounts with smart automatic rotation.
- System Tray Support: Minimize to tray with quick-access menu (Start/Stop, Exit).
- Global Hotkeys: Use Ctrl + Alt + J to toggle the window instantly from anywhere in Windows.
- Seamless Automation: Auto-start on boot with [—tray] support and single-instance locking.
- Smart Cooldown: Auto-TTL cooldown management — accounts reactivate automatically after 60 minutes.

? Jinx AI — UPDATE ?

--- WHAT'S NEW? ---

? Core Intelligence Upgrades

- Streaming Responses: Don't wait for the server. Watch your answers generate in real-time.
- Auto-Retry Failover: If a quota hits, I automatically switch to the next available model. No interruptions.
- New Models

[b]? Interface & UX Overhaul

- Multi-Tab Conversations: Handle several chats at once, just like tabs in a browser.
- Persistent History: Your chats are saved. Pick up right where you left off.
- Dynamic UI: New bubble animations (fade-in) and precision timestamps on every message.
- Jinx Quotes: A randomized system of my "thoughts" injected into the UI to keep things interesting.

"? UNLEASH CLAUDE SONNET & OPUS 4.6 WITHOUT LIMITS ?"

Your main post says there are no limits, but now there are? Which is it?

I'm also curious why you're not offering an API. What stops someone from running your executable and looking at traffic? Or why this is being offered so cheaply when it could generate thousands daily from a proper service.

Popular - April 22, 2026, 7:38 pm

This looks incredibly amazing and exactly what I am needing - I would love to try a vouch copy and leave an honest review if possible? Ill gladly pay for month 2 and so on

? Jinx AI — THE POWER UPDATE ?

--- EVOLVING THE CHAOS ---

? Advanced Logic & Model Control

- A/B Compare: Benchmark two models side-by-side in a single bubble.
- Branch & Fork: Split any conversation into a new branch from any message.
- Context Rules: Inject persistent system files (.cursorrules style) into every request.
- Conversation Tags: Organize your mess with free-form tags (Work, Code, etc.).
- Compact Flow: One-click summarization to keep the context window lean.

? Command Palette & Fast Navigation

- Ctrl+K Palette: Fuzzy search commands and chats without touching the mouse.
- Slash Commands: Quick actions in the input: /explain, /refactor, /test, /fix, /sql.
- Live Token Counter: Real-time tracking with orange warnings when context gets heavy.
- Power Shortcuts: Full keyboard control (Ctrl+N, Ctrl+Tab, Alt+1..9, Ctrl+L).

? Win11 Visuals & Markdown Rebuilt

- Modern UI: Windows 11 Acrylic backdrop, rounded corners, and smooth LERP scrolling.
- Drag & Drop: Drop any file into the UI to auto-detect language and dump it into code blocks.
- Pro Markdown: Rebuilt support for Tables, Blockquotes, and clickable ShellExecute links.
- Syntax Highlighting: Full color support for C++, Python, Rust, Go, SQL, and more.
- UX Polish: Skeleton loaders with pulse cursors and pinned message "Star" markers.

? System Stability & Backups

- Crash Reporter: Automatic exception filters with detailed .txt log generation.
- Safe Backups: Timestamped folder backups and easy restore functionality.
- Advanced Logging: Filterable console logs (Info/Warn/Error) with text search.

The system is sweatier than ever. Ready to break some rules?

Hotchicken - April 29, 2026, 3:02 pm

What is this exactly? Is it like some way to use Claude code CLI using free accounts or something.

Honestly a bit lost and confused as to how one would utilize this software ?

Stanley - May 1, 2026, 12:45 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Purchased a month - Can confirm it works. Have access to Sonnet 4.5, Haiku 4.5 and an array of other models.

Cleaver way of working - forwarding to 9Router myself and distributing with the rest of my models.

Legacy - May 27, 2026, 8:10 pm

Doesn't work with windsurf does it?

Karshiellita - May 28, 2026, 5:40 pm

Can you drop me a message? I'm interested in buying or testing this out. Just wanted to know what the limits are and if there's any way to make it work with Google Antigravity.

Also, can this be used for day-to-day tasks aside from coding like research, customer support, editing responses, handling tasks daily, or general token usage for regular workflows?

And if an account gets limited or rate capped, how long does it usually take before it resets?

NotJinx - May 29, 2026, 10:41 am

I wanted to write this review sooner but wanted to have time to test it but without further ado, here's my honest review:

This is a 10/10 AI service and does everything you would want from it. It offers multiple different AI platforms like Codex and Claude. You can integrate it with pretty much anything, but if you want to use it in the app, the UI is amazing! I love the usage counter that shows how much you've saved based on tokens used.

The app is easy to setup, just download the exe and start the server and it just works! I had a bit of trouble at first getting it to work but it was 100% my fault. The reason I'm bringing this up is because despite it being user error, NotJinx helped rapidly resolve my problem.

I can vouch 100% for this product, and will buy the monthly plan again as long as the service is still up.

P.S. I love the little pop ups with programmer themed sexual innuendos, it adds a playful part to the tool. It's the little things like that which make the tool more vibrant and full of personality. It genuinely made me laugh first time I saw it.

So I run exe and run claude in vs code and it never runs out of credits?

TheAutist - June 3, 2026, 7:05 pm

So Im using Emergent.Sh currently. Would interacting with this be done in about the same way?

NotJinx - June 6, 2026, 3:58 pm

? Jinx AI — NEW UPDATE ?

? New UI Improvements

? New Models: Llama 3.3 70B, DeepSeek V4 Pro, Kimi K2.6. Nemotron Super 49B, Llama 4 Maverick, Big Pickle, DeepSeek V4 Flash, MiniMax M3, Nemotron 3 Ultra, MiMo V2.5, Llama 3.3 70B Fast, Qwen2.5 Coder 32B, DeepSeek R1 32B

The system is sweatier than ever. Ready to break some rules?

Nice read, will shoot you a dm

SIM-2502833 - June 6, 2026, 9:40 pm

Is this a reskin of <https://www.npmjs.com/package/antigravity-claude-proxy?activeTab=readme> with a UI slapped on?

NotJinx - June 7, 2026, 6:34 am

No

iamcodie - June 21, 2026, 6:23 am

I got a vouch copy to try this out, and honestly, I've been really impressed. Having access to models like Claude and Codex in one place is super convenient, and the UI is clean and easy to use. Everything feels polished, and the usage tracker is a nice touch. Overall, it's a solid service that I'd happily recommend.

Legacy - June 21, 2026, 9:03 pm

Does this support top models like opus 4.8v?

testspambom - June 23, 2026, 10:53 am

is this still available?

Captain Pre - June 24, 2026, 11:30 am

Reach out to me at @CaptainPre in tg.
I am limited and cant add you for some reason.

blufia118 - August 1, 2026, 3:17 pm

im still completely confused as to what this is..so its just a fancy proxy? you still have to supply your own accounts etc? im assuming.. there is no clarity from what ive seen.

You dont use anything from your side!! you will follow the setup to add the api and its started this is a few click and fully automated!! less than 10 click NO KEYBEAD NEEDED AT ALL and you are already coding!!!! INITIAL setup is done using only the mouse its not hard at all one click first key is set a few more ckick you set the second LETS CODE :)

NotJinx - August 18, 2026, 3:28 pm

Hi, I haven't been able to reply due to health issues. I'll be working on a new version of Jinx C2 and Jinx AI, and previous buyers will be able to get a copy for free. If you've sent me a message, please send it again; I'll be available in a few day

mistu2025 - *August 19, 2026, 11:09 am*

I am familiar with something like this but they are way too expensive, so I cannot wait to try yours.

gex231 - *August 24, 2026, 5:58 am*

Reached out to you on TG and opened a contract. Waiting for your response.

I understand you have health issues at the moment so no rush if you are currently unable to complete orders.

MassMax - *August 31, 2026, 5:47 am*

Could you please explain how it works? Can I using antigravity with it or official claude code, codex?

HaXeR - *September 7, 2026, 1:36 am*

is it available?

NotJinx - *September 10, 2026, 1:41 pm*

(Sep 7, 2026 01:36 AM)HaXeR Wrote: [\[CITE\]](#) is it available?

No, working on v2
