Any gambling game has odds against you and you are more likely to loose.

yeah it's rigged but there's a surrender button. which makes it pretty skill based.
i've made a couple thousand bytes from it, just don't tilt bet.

? loading encrypted image... don't let the image trick you, I'm still down overall.

I find the more you bet, the more rigged it will be,
stick with 2/10/20, if you lose 5-10 times in a row, bet 50.

degenerate but I managed to make back what I just lost,
dont do what i did here lol:
