Thread: [NFSW Image AI - Uncensored | No Sign-ups | 2 Links | Completely Free](#)

Prawnster - April 16, 2026, 6:49 pm

We've got 2 separate links with uncensored image generation AIs.

I've checked the other uncensored AIs and confirmed that these are different links.

The 1st one is best for more photorealistic images that are not-safe-for-work (as well as SFW images if you'd like!).

2nd one seems to thrive more with anime-type images from my tests.

Both require no signup and are free as far as I've tested - If you get rate-limited/blocked, swap VPN server.

[Preview 2 - NSFW](#)

Enjoy! :)

Does this allow a reference photo to be used at all?

From my testing, the first link does allow you to use a reference photo but when you do, it seems to block any attempts to make it NSFW.

Only seems to be uncensored from pure prompting.

Well that's good because the other sort would be horrible exploitation but what you've got seems to be reasonable. Are you going to say what the AIs names are or sell that for bytes?
