Hey hey!

In the 19 years of Hackforums, what is for you the best moment in all those years?
Could have been something that has happened before you arrived!

The best moments are whenever I make a little bit of \$ here. Always grateful

Not sure about the best moment. But one of my memorable ones had been when I first found the forum. I wanted to learn about videogames hacking and I'm so glad I did. That path helped me learn so much about computers and the internet. I wouldn't be in this position without HF.

I met a lot of good people here, and also had the chance to join a big group like a brotherhood.. there are actually a lot of moments but they can't be explained here because it's too long, the point is I'm very happy because hackforums can survive until now! Happy birthday hackforums

I wish I had bought BTC and ETH when I joined HF. I had tons of fiat looking at me then. No hard feelings we learn everyday.

Congrats on being an old head. Crazy to see the forum, and the world change over the nearly 2 decades.
