Thread: [How do you visit HackForums?](#)

Charlie Sheen - April 25, 2026, 6:36 pm

Currently working on a project and I'm curious how most members visit HF. Are you a mobile tablet/cell phone user or do you visit on desktop/laptop? Are you on Android or iPhone?

I'd say majority of my time is through mobile/iPhone. When I'm working, I'll be on my desktop and browse it then. It's probably roughly a 60/40 split in favor of mobile.

Always on my desktop. I don't think I'd like interacting with a forum on my phone.

Rahul007rhp - April 25, 2026, 9:56 pm

Im always from my mobile phone Android

Edmond Dantes - April 25, 2026, 9:59 pm

I'm visiting it only from my Iphone because I got no access to PC atm. I can't wait to get my PC back and be more active because it's harder for me to type on a phone.

Almost always on a PC though ironically I'm currently on my android phone.

I use it on PC as well as in mobile. I must say that for a while now mobile experience has been real good. I remember back in the day it used to suck hard compared to the PC version.

Props to HF team for continually making the forum design better.

Never used my phone for it, just PC.

Jamika - April 26, 2026, 12:01 pm

From tablet and my Android phone , mainly from phone

peldon - April 26, 2026, 1:00 pm

On PC for me. Sometimes on phone but i don't like

?inimalist - April 26, 2026, 4:24 pm

Mostly iPhone.

Squints - April 26, 2026, 5:07 pm

Usually on my laptop.

Mix - April 27, 2026, 7:14 pm

I mainly use my main PC, sometimes use my surface pro which would be a laptop/tablet but thats only if I am on the move.

Popular - April 27, 2026, 7:36 pm

Always on my pc, but kind of considering setting it up on my tablet and posting more

xadamxk - April 27, 2026, 7:50 pm

Given that most user so far are PC users... you better not be making competition to HFX

oRequiem - April 27, 2026, 9:04 pm

Only my PC (even though I haven't been here much lately). I'm basically never on my phone.
