I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP

(Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Anyone tried and reviewed in depth?

I'd love to to get a 1x build vouch if you're offering them. See lots of these types of posts but never much reviews. Support native and .net, x64 and x32?

If I understand correctly, you mean that you open the PDF file and click ENABLE so it then downloads the RAT and the RAT needs to be run manually the exe file right?
