Thread: [What to do with 50+ Clients in RAT](#)

CTrePT - April 28, 2026, 5:59 pm

I coded my own FUD Advanced RAT and uploaded three YouTube videos to spread it. I got over 50 clients within two days.

However, I don't know what to do with them.

They've been there for almost a month and a half. I'm impressed that it's still FUD, but time is running out.

My custom RAT has HVNC, Silent FUD, XMRig, stealers and more. It has everything a modern RAT should have. Does anyone know how I can make use of these clients other than leaving them alone?

If you don't have a plan, why not find something that you want to do?

Or you could sell the bots, make some money, and cover your tracks.

Popular - April 28, 2026, 6:15 pm

Maybe sell installs on it? Or use it for stresser power? xD

hi

you have ratt to infect via Email or how can you infect Android and Windows devices via email?

You couldn't get a file that only prints "Hello World" to be accepted by email services.

Not trying to attack you, but the contradiction and inconsistency between claiming to have coded an advanced FUD RAT and then asking for advice on how to use the bots is pretty remarkable. ?

Are you sure you're being 100% honest? lol

I kind of read it as a hidden advertisement for his own RAT.

"Oh no look at my successful RAT that's fully FUD with these specific features, what shall I do with all these bots."

swezasf - April 29, 2026, 2:13 pm

troll them

Indeed, it seems pretty common here to slide in with a freshly copy-pasted RAT or tool straight out of the slop box. ? (Not trying to sound dismissive.)

of course not, it is too private for the eyes of mere mortals.

Some might say it's a legend even..

And it will be no surprise if you claim you're the exception lol

I have quite a lot of them too, and I don't know what to do either.
