Thread: [Recommend me IPTV service](#)

**TYLER** - April 28, 2026, 6:50 pm

Who has reliable IPTV services that has been around for quite some time. I see a lot of people claiming their services aren't shitty and they don't ignore their clients but then looking at reviews and even personal experience, the service is shitty. I'm currently dealing with a service I bought through a friend for \$35 and the servers have been down with no help.

Help a brotha out

I honestly feel like they are all the same. I have tried most suppliers and I don't think I've ever seen a quality difference in any of them.

Thanks for your honesty. That's kind of what I figured. I know it's not easy to run high quality IPTV services due to a lot of what can go wrong behind the scenes. Just wasn't sure if there was one that most people here recommend that has minor hiccups that get resolved quickly.

Hey Mate,

Check out/hit up my boy <https://hackforums.net/member.php?action=profile&uid=1090293> - i am hosting his services.
