QuimaCORE - April 30, 2026, 7:16 am

????????????????????????????????????

QuimaCORE

Advanced Builder Engine — v2.0.0

????????????????????????????????????

? 9 Builder Modules — 1 Unified Panel ?

????????????????????????????????????

? MODULE OVERVIEW ?

????????????????????????????????????

? XLL BUILDER? Local Payload — Embed EXE directly

? Web Stager — Download & Execute

? RunPE — Fileless memory injection

? AES-256 Encryption

? Anti-VM / Sandbox Detection

? Direct Syscalls (Hell's Gate)

? Obfuscation + API Hashing

? AMSI & ETW Bypass

? Persistence & Melt

? File Binder & Massive Junk Data

? LNK BUILDER? URL Stager Mode: Multiple downloaders, Link Spoofer (CVE-2025-9491, Hide Args), Command Obfuscation, AMSI Bypass.

? Local Embed Mode: Embed EXE, Fileless Reflex Load, WMI Process Break, RTLO Spoofing.

? Formats & Icons: .LNK / .ZIP / .ISO / .IMG | Custom & Windows System Icons.

? CHM BUILDER? Execution Modes: EXE, BAT, VBS, PS1 (Memory)

? Encoding: Base64, CharCode, IEX, Alt Paths

? Evasion: AMSI/ETW Bypass, Sandbox Detection

? HTML Manipulation: Dynamic COM Gen, ClassID Split, Delayed Execution

? Presets: Stealth / Max AV Bypass / FUD

? MSC & CPL BUILDER? MSC Builder: Payload generation with polymorphic builds.

? CPL Builder: Native DLL compilation with Control Panel handler execution.

? SCRIPT BUILDER? Modes: Generate .wsc/.sct or embed payloads directly into scripts.

? Multi-Format Obfuscation: VBS, BAT, CMD, PS1, JS, WSF, HTA.

? Engine Features: AES/Base64, Variable/Function Renaming, Flow Flattening, Junk Code, SysWOW64 Redirection, Smart Analysis.

? MACRO BUILDER? VBA macro generation with string obfuscation.

? Auto_Open/Document_Open triggers (Word & Excel).

? EXE & JAR LAUNCHERS? Process injection, evasion layers, cross-platform Java targeting.

??

? PLATFORM FEATURES ?

??

? Modern UI — React + Tauri (native performance)

? License — Secure HWID-locked authentication

? Modular Plans — Purchase only the modules you need

? Tiny Footprint — Native Rust, no Python/Java dependencies

bro any discount

Sticky Bot - May 9, 2026, 10:00 pm

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on May 16, 2026. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

BUILDER - May 26, 2026, 8:05 am

"I've purchased and am currently using all 3 applications from this developer:

QuimaRAT (6-month license)

QuimaCORE (XLL and LNK modules)

QuimaLoader (Bought a 1-month plan to test it out, and it's been great so far)

I've bought and tried countless RATs from HF and other places in the past. But every single time, I was forced to spend extra money on crypters because the stubs kept getting detected. QuimaRAT is genuinely FUD and completely eliminates the need for a crypter.

and QuimaCORE (Builder) The XLL and LNK exploits work flawlessly.

I know some people might point out that his HF account is banned. I actually asked him about this directly before buying. He explained that he paid for HF membership 4 times, but his account was closed each time without any valid reason (which happens quite a bit here, let's be honest). His transparency and the quality of the product were enough for me.

Don't listen to the haters or people leaving negative comments without even trying the software. I can confidently say these are some of the best tools you can use right now that actually give you your money's worth. Highly recommended."

4chan.org/bl - May 26, 2026, 12:41 pm

Do not buy, seller is a scammer and multi-account posting & self vouching. ^^ post above.
