Thread: [\[Tutorial\] Name resolve from Paypal \[Old school method\]](#)

Sift - May 1, 2026, 4:44 am

Let's say you have a email and it's linked to a paypal account and you want to get the name from it.

And you've confirmed it has a paypal account linked to it.

You need a paypal account for this.

You can go to send money or request money

? loading encrypted image...

Write in the email and it should return like this

? loading encrypted image...

Very simple and efficient method.
