Thread: [QR Code Drainer for USDT BEP20 Trust Wallet](#)

mrdevil888 - May 5, 2026, 5:31 pm

? [Wallet Drainer] QR Code Drainer for USDT BEP20 ERC20 Trust Wallet ?

Serious Inquiries Only • Experienced • High Success Rate

? How does it works

• Send the QR code to the Victim; just ask for 1 USDT or any amount of USDT. As soon as the victim scans to pay, the script bypasses the wallet connect method in Trust Wallet, and once the victim clicks 'confirm' in the popup, his entire USDT will be drained in just one click by scanning, and you still get lifetime approval for transferring his usdt.

??

? Includes

1. Tutorial to launch it
2. Qr code generator included
3. Fully unobfuscated code
4. Updates provided throughout

??

? PRICING

?Full source code Price: \$1000

? Step by step guidance

? No hidden fees

? Full support will be provided

??

? Major Update

All our drainers just got heavy upgrades. bypass game is now elite:

- EVM Drainer — bypass + toggle swap (updated)
- TRC20 Tron Drainer — bypass + AML Project integration + QR method
- TON Drainer — bypass + crasher
- Solana Drainer — bypass + bypass with contract

99% of drainers on the market still don't have these bypasses. ours do.

Fresh Honeypot contracts dropped — new evm versions, extremely low risk, clean on all scanners, private sale only. limited slots.

Also running the latest Flash Tokens — fully updated and ready.

Still here. Still ahead. Still the best supply.

DM me right now if you want any of this. slots are limited.

For all questions, write to the DM

Regards, @honeymanOne?
