The Pentagon on Friday released what it says are “never-before-seen files” on UFOs after President Donald Trump directed the agency to do so earlier this year.

The batch of files outlines various investigations of reported sightings of Unidentified Aerial Phenomena that span decades.

“The American people can now access the federal government’s declassified UAP files instantly,” the department wrote on [X](#), referring to unidentified anomalous phenomena, the modern term for UFOs. “The latest UAP videos, photos, and original source documents from across the entire United States government are all in one place – no clearance required.”

With the budget they got, one would be expecting some higher techs.

Something Fishy about those files sir ! Always low quality , always something is missing a key Puzzle piece is missing !

TheNaturalBoy - May 9, 2026, 8:38 am

I genuinely would like to know what those things are. Although, it makes me curious that they’re almost always circular, oval-shaped, or slightly elongated objects. I don’t think I’ve ever heard of one that’s geometrically more “exact,” and that really makes me wonder lol. At the same time, though, it’s also a good starting point for making bigger discoveries. Still, I can’t help but think that this could once again be used to distract people from important things happening around the world.

I wonder what are they trying to distract us away from this time. Whatever it is I am glad more and more people are waking up.
