Thread: [UAC Bypass 2026](#)

DramaKing - May 9, 2026, 4:43 am

I've been sitting on this for a bit but just got motivated to post it. I haven't tested it, but it demonstrates an undetected privesc method.

Excellent Post. Thanks for sharing.

Sift - May 13, 2026, 9:56 am

High quality share very nice

Wym sitting on it lol, anything running beneath user level bypasses uac, you coded a simple driver?, Weve been coding kernel level drivers for 20+ years, what do you mean sitting on it.

Nvmd its actually a 30 line shell script, killing uac services in windows, his ai scraped from a 15 year old github repo or some lazy shit.

I've been sitting on this video that someone else made, silly. I thought that stating how I haven't tested it was pretty clear. It may be lazy, but if it works or recently did, it's something.

A decade ago when I was active in this forum, you posted in this section when it could send you to prison, this is barely beyond the ability of native task manager. Another interesting observation is that you're repping the linux pengo. Linux user?

your video is restricted by youtube.

Can you upload else were.

I think it was my VPN, as its working for me currently.

BTW I am still sweet 16.
