Thread: [Google Maps Business Reviews \(& Yelp! Reviews\)](#)

G Reviews - May 11, 2026, 11:33 am

? loading encrypted image...

Hey everyone,

Google Maps reviews are one of the biggest trust signals for local businesses online. When potential customers search for a service on Google, the businesses with stronger ratings, more reviews, and active customer engagement naturally stand out above competitors.

Positive reviews help increase visibility in Google Maps search results, improve click-through rates, and build instant credibility with new customers before they ever make contact. A business with a solid review profile often receives more phone calls, website visits, direction requests, and overall conversions compared to businesses with little or no social proof.

In today's market, reviews influence purchasing decisions heavily — whether someone is looking for a restaurant, contractor, dentist, auto shop, law firm, or almost any other local service. A strong Google Maps presence can directly translate into more traffic, more leads, and more paying customers.

We work with all kinds of local businesses including seo firms, digital advertisers, contractors, restaurants, law firms, medical practices, and service companies that want stronger visibility on Google Maps and better social proof for potential customers.

What we focus on:

- Real mobile devices
- Mobile IPs
- Manual posting only
- Natural delivery schedules
- High retention rates

If you've used review services before, you probably already know most providers disappear after payment or deliver reviews that vanish within days. We built GReviews to be the opposite of that — quality-first, transparent, and focused on results that actually last. If you've ordered from a review service in the past you most likely received low quality review text. Something like "High quality service. Recommended." or "Excellent service." These are examples of extremely poorly written reviews. Greviews writes high quality reviews like the following:

Code <https://gyazo.com/ec8ebcbeff5e0b4cea628925b7fee80e>
<https://gyazo.com/a2e272146eb6fe4f973442f7d58e0a49>
<https://gyazo.com/817755fe541374dccffa56c36117f679>
<https://gyazo.com/4f690dd0dd1821ea5c9cd56232842f8d>
<https://gyazo.com/97c2ea7b177405d08d146d7b726e4266>

For those of you that need photos included with your reviews, we can AI generate photos for any business, business setting (conference room, outside, building shot, parking lot, company name on the wall, etc... and then inject mobile phone metadata into those pictures so when Google scans the photos to see if they are real or not Google sees our injected metadata.

Examples:

Code <https://gyazo.com/446dd4f8fddb9d3e2334ff33523374b6>

<https://gyazo.com/6bbcef76c36f226495a251910c8d84f2>

<https://gyazo.com/b4c1e223c617fadcfc00d2e3928f7318>

All pictures include GPS metadata so Google can also verify where the actual photo was taken. This further enhances the trustworthiness of our uploaded photos. All photos have different model mobile phone injected metadata. We use 26 different phone models in our metadata collection.

This is a high quality review service. As such, we do not base our prices at the bottom of the barrel as most bot-based competitors do. Our prices are based on the following factors:

- 1.) The cost of maintaining, training, procurement, and cultivating the service and accounts.
- 2.) The cost of AI generated photos and injected metadata at scale.
- 3.) The cost of mobile data at scale.

The flip-side of this:

Reviews can go both ways. They can be used to massively help and expand a business and they can also be used to destroy a business. Usually we do positive 5-star reviews to help businesses expand. However, we understand that competitors exist and sometimes there is a need to remove that competitor from the playing field. Whatever the reasoning may be, negative review campaigns can also be launched and enough negative reviews consistently can destroy a GMB property. Whatever campaign type you need, we are prepared for it.

Our Pricing Factor:

5 Google Map Reviews (Positive or Negative, 7 Day Delivery Period): \$75 USD

10 Google Map Reviews (Positive or Negative, 10 Day Delivery Period): \$150 USD

20 Google Map Reviews (Positive or Negative, 14 Day Delivery Period): \$300 USD

50 Google Map Reviews (Positive or Negative, 60 Day Delivery Period): \$750 USD

100 Google Map Reviews (Positive or Negative, 120 Day Delivery Period): \$1,500 USD

Delivery time frame is based on your GMB age, amount of pre-existing reviews, and GMB industry.

High-risk GMB industries receives the slowest drip-feed methods to preserve the GMB

Corporate Rates (Based on spreading reviews across multiple GMB's simultaneously):

250 Google Map Reviews (Positive or Negative, 10-14 Day Delivery Period): \$2,500 USD

500 Google Map Reviews (Positive or Negative, 14-21 Day Delivery Period): \$5,000 USD

750 Google Map Reviews (Positive or Negative, 21-30 Day Delivery Period): \$7,500 USD

1,000 Google Map Reviews (Positive or Negative, 45-60 Day Delivery Period): \$10,000 USD

3,000 Google Map Reviews (Positive or Negative, 60-120 Day Delivery Period): \$24,000 USD

5,000 Google Map Reviews (Positive or Negative, 90-150 Day Delivery Period): \$35,000 USD

Pricy service but interesting. If it wasn't in the thousands and in the hundreds I think I would be a buyer.

It takes a whole lot to do this correctly. It's not as simple as you may think. But I'm open to negotiations. Send me a pm and we'll hash out a deal.

adbhf - May 29, 2026, 1:48 am

I'm also interested but it's a bit too pricey for me at the moment.

Send me a pm with your requirements and we'll negotiate something specific for you. And generally speaking, I'm about to revise my pricing publicly due to the technical advancements I've recently completed.

eComrade - June 10, 2026, 5:07 am

I own a marketing company- no one is going to pay these prices. I do believe businesses can actually benefit from having 250+ positive reviews from SEO and leads it brings in.

One issue I see is Google is very sensitive when it comes to the Google Business Profile I would have a hard time paying you that money then relying on you to continue to update reviews if they get lost or help fix my account if any bugs arise.

I would be interested in seeing lower prices with less reviews or potentially the opposite of 1 star review bombing competitors. PM me, and im not trashing or trying to, this is a good service. Thanks.

I would be interested in seeing lower prices with less reviews or potentially the opposite of 1 star review bombing competitors. PM me, and im not trashing or trying to, this is a good service. Thanks. I have clients that pay these prices and higher. Mostly large seo companies that out-source this type of work. However, as I mentioned further up the thread I'm going to audit the prices because the dynamics have changed and I am able to lower the prices here.

One of the things you mentioned was that you had no faith that I'd help you in the event a review gets filtered or deleted by google. However, contrary to how other companies don't help in this area, my smart systems re-verify all reviews every 6 hours and if they have been filtered or deleted the system automatically sends another account to fulfill the quota. This is the only way to guarantee our work.

I can see every gmb, every statistic, and control my entire fleet from one of the most advanced control panels ever designed for this niche. At a glance I can see how many gmb's we have, how we're progressing for the month on our quota, when we're behind schedule (due to newest edition testing; I do testing and new updates daily) how account onboarding is going, when I need to add more accounts to be trained and warmed, how many more reviews need to be done per gmb for the month to meet the quota, etc. I have real-time stats on everything. I have built this operation out to be self-aware, self-healing, correct its mistakes, re-verify reviews and any anomalies detected are flagged, reviewed, adjusted, and in the event of filtered or flagged reviews the system sends out a new reviewer based on an account readiness evaluation first. And I'm constantly adding new code, new features, new verification systems, etc to every part of this operation and making the system both smarter and more autonomous each and every day.

G Reviews - June 21, 2026, 10:56 am

Today I have lowered prices substantially in the first post. The prices were dropped from \$30 per review to \$15 per review. Keep in mind that accounts that are performing the reviews are professionally aged, have at least 5-20 prior Google-approved reviews and/or ratings (it takes Google on average 7-10 days after a review has been performed by your account to actually update your account stats to show prior approved reviews), includes proper name and profile photo.

Another thing I wanted to mention about delivery time frames: if I already have trained and experienced accounts local to your gmb's physical location reviews can start almost immediately. But this is based also on the age of your gmb and the particular niche that it is in. Digital advertising, seo, and home repair are the most difficult niches to work on for reviews, so these categories have slightly longer delivery time frames because Google views these particular niches as frequently spammed so it scrutinizes them alot more carefully.

Stanley - June 21, 2026, 10:59 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
