Thread: [\[FREE TRIAL\] Windows and Android remote control **hidden control desktop and phone**](#)

CYBERWAR WEAPONS - May 11, 2026, 2:26 pm

? AI HIDDEN REMOTE DESKTOP AND PHONE: AI hRDP ? The Elite Autonomous Windows and Android Bridge – See. Reason. Execute.

Stop just "connecting" to your PC and Android phone. Start talking to it. ??

AI hRDP has evolved beyond simple remote access. We've integrated a Natural Language Interface that allows you to control your entire OS through a simple chat window. No scripts, no macros, no complex setups. If you can type it, AI hRDP can do it.

> The "Chat-to-Action" Engine: AI hidden remote desktop uses a specialized LLM bridge that translates your conversational intent into precise hardware-level inputs. Whether you're on your phone or a different PC, you just tell the AGI what you need, and watch it navigate your desktop in real-time.

? [Video demo here.](<https://streamable.com/9w7vhf>)

? SYSTEM SPECIFICATIONS

Conversational Command: Direct Chat Interface. Type "Find that PDF from yesterday and mail it to Bob" and the AGI handles the file search, email client, and attachment logic.

Vision Engine: Low-latency DXGI Frame Buffer. Maps UI elements using OmniParser to create a real-time "Coordinate Grid" for the AI. Control Core: Kernel-Level Raw Input. Uses the Interception driver to bypass software restrictions. Supports human-mimetic mouse curves.

Deep Analysis: Integrated Binary Ninja / Ghidra bridge. If the AI doesn't understand a button, it reads the .exe logic to find the underlying function. Stealth Mode: Operates via Session 0 / Headless Virtual Desktops. The AI works in the background while your main screen stays completely free.

? <https://i.ibb.co/MxzG4NT3/f-J8PBcd.avif>

? CAPABILITIES

Natural Language Processing: Complete tasks using plain English. No programming knowledge required. Universal Compatibility: Works with any Windows/Android application—no API, no plugins, no "hooks" needed.

Autonomous Reasoning: Give it a goal (e.g., "Find the latest invoice in Outlook and upload it to the CRM"). It handles the rest. Invisible Persistence: Runs as a Protected Process Light (PPL). It stays hidden from standard task managers and system scans. ???

Total Stealth: Engineered so that the Windows and Android OS cannot "see" your hidden remote desktop program. Encrypted Tunneling: Powered by WireGuard/Tailscale integration for a direct, P2P encrypted connection between you and the AI agent.

? LICENSING & ACCESS

FREE TRIAL: \$0 / 3 days, limit 10 devices LITE: \$279 / 1 Month

ELITE: \$351 / 2 Month DELTA: \$700 / 5 Month

? Accepted: BTC / LTC / XMR / ETH
? Vouch Copies: 0/3 remaining for high-rep members.

? *Notice: AI hRDP is a tool for developers and automation specialists. We do not condone or support illegal use of this software. Remote access requires proper authorization.

Interesting. Can you provide video example? And more detail on stub (lang size transport etc).

[Video expires in 2 days](#). Language is C for Windows PC and Android uses Kotlin. Stub size still pending validation cause I'm developing new works if you need a smaller stub ask. I can add custom any transport.

DramaKing - May 12, 2026, 5:23 am

This is probably not the first AI project to control a desktop using a vision model, but you have something very interesting here. The "AGI" is completely on-device?

Yes.

Mastercarder - May 13, 2026, 1:09 am

Looks very promising. Really like the idea of that. Is it live atm?

Stanley - May 20, 2026, 8:06 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

kaka66908 - May 23, 2026, 11:44 am

Hey, what's ur telegram please?

kaka66908 - May 24, 2026, 1:59 pm

fake stuff, I paid \$25 for trial and this guy sent me fake shit and blocked me and trolled me.

Binance - May 29, 2026, 5:52 am

Are you gonna connect your personal phone to windows YourPhone next and larp some more?
Or are we just gonna continue with android studio

If youre going to scam at least be good at it.
