Thread: [Why isnt there an option to put a notification as not read after reading it?](#)

Jinkow - May 11, 2026, 3:19 pm

Can anyone explain please. Doesnt make sense for me. Can they please add it as an option or will it be too difficult?

Edmond Dantes - May 11, 2026, 11:12 pm

Uh, can't you just open your notifications again ?

RangoWorld - May 12, 2026, 2:30 am

I'm not sure. But why would you need to unread it when you've read it? It's not a privacy thing like whatsapp where the other person will know if you opened a message notification.

The alerts are there to remind you. Only when you read the notifications is when they go away.
After which point what's the use for a reminder?
