Thread: [google dorks & making combolists](#)

**liltearz** - May 13, 2026, 2:09 pm

hi im a beginner in these kind of stuff. i want to learn, not just being a "script kiddie".  
how does google dorks become combolists? (email:password)  
ive been trying on my own to learn, but i guess forums are the better way lol  
with this forum i tried some tools, but i want to understand em better  
i used a tool from this forum (deepdork), but to be honest i really cant figure what the result is  
example:bing  
.com/ck/a?!&&p=1fba25e9df2a47ab2b858b49600e04ddc6b09ae64752d87daefcc56f1b15b161Jmldt  
HM9MTc3ODYzMDQwMA&p=3&ver=2&hsh=4&fclid=3b5dcd9a-2225-6851-3f38-&u=a1aHR0cHM  
6Ly93d3cuZ2FtZXJzLm9yZy9wdWlvZ2FtZXMvdXdwLXVtbC93aW5kb3dzLw&ntb=1 (deleted a part  
of it for security reasons)  
what can i do with this? i thought that a parser would be useful to convert these dorks into a  
combolists, but things arent this simple.  
i read that sqli dumper would be the answer, if only it would work nowadays. can someone help me  
to understand & get better? i would really appreciate that  
hope that someone can answer me soon

They don't. You can Google public pastes containing them for example, but they don't 'convert.'

ok so, for learning purposes, making combolists nowadays isnt really worth the time, right? i would

like to know more stuff, could i have a direct contact with you?

People work from leaked data more than combo list. There is comun used user/pass alway good but random brute dont worth.
