int main() - May 17, 2026, 2:08 am

[THREAD] Xtreme Botnet Setups - \$500

Full botnet setup for Windows & Linux machines
Mining ready with powerful CPUs & super port speeds
Includes a port scanning server for finding new targets

You will be provided with exploits that will get you mixed servers with admin and root access, it is left to you what you would like to use them for, i help with mostly all requests that comply with hackforums rules, you can execute your own malware, but keep in mind these are mostly servers and not home desktop computers, so data theft (eg crypto drainers, stealers and other banking trojans are mostly useless, you will mostly make use of the hardware/network)
Mentoring provided to help you get started

You can get around 10-20.000 servers if you use all exploits included, and even more if you think outside the box and use the servers for traffic

You can start a contract to initiate and then contact me for more information

Knowledge of Linux is required to work the files as most are written by me in Go / Python and require basic knowledge of editing text files, port scanning, Fingerprinting and finally exploiting to run your payload (i help with everything but you have to know how to walk so i can teach you how to run)

Telegram @Serenityxtreme
[contract=tid]Start Contract[/contract]

int main() - May 22, 2026, 4:55 am

Sold one copy out of 5 one more copy and price will be raised to \$1,000 if you get creative you can make your money back easily

int main() - May 23, 2026, 1:31 am

Sold second copy only 3 more remaining, please open contracts here because most users that end up buying are not members on here, price will be \$800 as of now per copy, i help with almost all tasks

int main() - May 26, 2026, 6:14 am

Only 1 copy remaining leaving it at \$800

Includes 3 RCE cve's fully configured to whatever you wish, i help with anything complying with HF rules

Scanning dedi(1 Gbps port)

Cpanel cve (public) also included (apart from the 3 CVE's) with scanner in GO, scan the entire internet and exploit thousands of cpanels in 1 day(use for traffic if you like mixed with a clickfix page)

7 - May 26, 2026, 10:27 pm

interesting to see you've sold copied but no review from HF users.

Interested though when I get time ill look into it.

int main() - May 27, 2026, 6:24 am

Yes barely any members on this forum know the value of this

int main() - May 30, 2026, 12:19 pm

1 last slot available, price is \$1.000 now, included custom made bot

int main() - June 13, 2026, 2:29 am

The slot remains still, i have been inactive for a few days, you get lists for all of the exploits included so you can execute your binary as soon as received! Obviously fresh scans yield more targets

int main() - June 18, 2026, 9:52 am

Selling individual exploits depending on how many bots you need for a lower price! Some that yield 3-5000 bots for \$350

int main() - June 22, 2026, 10:25 am

Price is currently \$700 i help with Mirai, qbot or any other bot you may want to run on these devices!

int main() - July 1, 2026, 3:46 pm

2 more slots on this then closing thread! Good idea for anyone getting into building botnets!

DeathPenalty666 - July 1, 2026, 3:58 pm

(Jul 1, 2026 03:46 PM)int main() Wrote: [\[CITE\]](#) 2 more slots on this then closing thread! Good idea for anyone getting into building botnets!

this is server with botnet and everything? I have my own hosting and a mirai botnet, i'm i hopeless in this?

int main() - July 2, 2026, 5:43 am

Yes i help you with everything but you need hosting server for the net

int main() - July 6, 2026, 4:16 pm

\$300 will get you a 10 Gbps port scanning server which should yield you much faster results!

int main() - July 8, 2026, 2:16 pm

New exploit added to the previous 3 that will yield by itself around 22.000 servers depending on your payload, last two slots at \$1500 for all exploits or \$400 per single exploit

Stanley - July 13, 2026, 2:05 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

int main() - July 14, 2026, 3:10 am

\$800 package still available including the most recent cve included is a 1 Gbps duplex dedicated scanning server, expect 18-25.000 bots from this single exploit

Riddick - July 14, 2026, 3:41 am

Get one of your customers to post itt and I'm sure your last slot will move more quickly.

int main() - July 20, 2026, 3:39 am

Yes i am asking my previous customers to vouch

ddda - July 20, 2026, 6:58 am

I am very interested in your technology, and I would like to know if you can handle other tasks.

jazz8927931 - July 23, 2026, 1:17 pm

can you set this up for Windows so knowledge of Linux isnt required that way?

cscscs666 - July 28, 2026, 12:39 pm

I need a website attack, if you can, please DM me your contact info.

I need a website attack, please DM me if possible
