Thread: [I need a discord account banned \(paying\)](#)

ProxyLand - May 17, 2026, 6:55 am

There is a Discord User that I'm having some troubles with, from a OSRS community.

At this point, he's basically attacking websites of mine. I am looking to have someone go into a discord server, and mass report up their posts within it. Alot of the messages are satire trolling, and fk'd up messages. lol. Shouldn't be too hard with that said.

I'm paying. But, I don't get scammed on this site. I'll need you to go first.

invite him to a server you own with a webhook. transfer ownership of the server to him and spam the webhook with fake stealer logs from "Blank Grabber" using a python script with multi-threading to spam even faster. discord will ban him and not you.

no problem, ive seen even 4 days ago someone using this method with success should still be unpatched. make sure the fake logs have real looking discord tokens in it or it wont work.
