Thread: [TOP SECRET UMBRA - NSA reveals swarms of up to 72 UAPs at 70K altitude & more](#)

Hackers - May 19, 2026, 7:16 pm

Let the naysayers hate, and the rest of us celebrate. Disclosure is just kicking off, and this is child's play. But this is also very interesting!

The original info mainly came out in 2009 & also was requested throughout time. Trump's recent exec order makes it easier for agencies to comply. This newest release is due to a FOIA request & it supplies all the data and internal notes to back up previous information.

Here are some highlights...

Quote:Objects displaying controlled behavior. Multiple entries describe objects with two yellow lights, flying at low altitude, that changed heading from north to west — silently (p. 314). A separate entry describes an object "going up and down vertically" that witnesses assessed as "impossible to be an aircraft," moving at high speed with "white-bluish luminous light" and "erratic turning movements" (p. 330).

Objects with physical characteristics inconsistent with conventional explanations. One entry, classified SECRET LARUM, describes a UFO as "spherical or disc-like in form with an established color brighter than the sun, with a diameter of one-half the visible size of the moon," observed above cloud cover with specific bearing and azimuth data recorded (p. 329). Another describes an "elongated ball of fire moving at high rate of speed" that, after covering some distance, "split into three balls of fire" (p. 333). A third entry documents an object with "luminous radiation of 22 meters extending in a spiral pattern" that gained altitude without noise (p. 322).

Military scrambles in response to unidentified objects. At least eight entries document fighter aircraft being scrambled to intercept UFOs. In the most dramatic case, 13 MIG fighters were dispatched to chase a single unidentified object (p. 236). Other entries describe military reactions to groups of objects — 72 at once (p. 63), 23 at once (p. 71) — at altitudes exceeding 70,000 feet.

Multi-witness sightings reported through intelligence channels. One entry, classified SECRET SAVIN, documents multiple independent observers reporting the same silent, direction-changing lights at approximately 2,000 feet distance (p. 315). The structured format — specific times, specific bearings, corroborating witnesses — reflects trained intelligence reporting, not casual observation.

As I've said numerous times here on HF & elsewhere... I have personally seen craft that can travel at speeds that would rip apart any known metal, and kill any pilot due to g-forces. These same craft were able to stop with 0 delay, no deceleration, and perform a 180 degree (full reversal) maneuver without any curvature, and come to a complete stop again.

I will keep harping on it because it's true, and I am glad that disclosure is escalating. As I always say... I can only corroborate the evidence of aircraft/aerial phenomenon that defies our understanding of physics. I have 0 evidence of "aliens" and have no solid proof of the source. I can only speak to what we witnessed on a few occasions. For those who are wondering, we used to live between two nuclear military bases in the USA and this could definitely be important, but whether or not that proves they were made by the US is debatable. I am only mentioning it because there are correlations between certain facilities and sightings, and that aligns with our sightings which primarily occurred between October 2024 & mid 2025.

Download the full PDF (100s of pages, and just like any other release, it includes both interesting and uninteresting info).

Quote: The production contains numerous heavily redacted pages, but visible portions show repeated references to:

Radar tracking of unidentified flying objects

Visual sightings

Objects moving across large distances

Altitude and heading information

References to objects assessed in some entries as "probably balloons"

Foreign or military reporting channels that remain substantially redacted

Declassification markings under Executive Order 13526

Redactions citing Public Law 86-36 / 50 U.S.C. 3605, a statute frequently used to protect NSA organization, functions, activities, and sensitive sources and methods

Mentally prepare yourself for more. We are only just getting started. Batch 2 from US Gov drops soon, with many more to come. There are millions of files from a number of governments. France just scheduled an official UAP session, Ukraine is being more vocal, and we can expect to see RU, China, Mexico, and a few others join the discussions as well due to long-term UAP related programs in those countries, and partnerships with what's referred to as the legacy program, or in other words, classified skunkworks & research groups.

Stay tuned.

Remember to not trust anyone trying to use this information to manipulate you. Evidence of existence is not evidence of the source. They are going to tell you exactly what to believe, while only providing evidence of existence.

It is absolutely crucial that you understand the difference^. If I do anything, I hope to help people understand that difference. It is so important. The evidence is real. The story might not be. Be careful of what you buy into... Many people will be grasping for answers, and that's dangerous with so many agendas.

Weekend Offender - May 19, 2026, 9:04 pm

I hope what you are saying does happen.. This post won't seem as crazy to read when very high and just about to hit 5AM lol. Like everyone's entitled to believe what they want to or have researched into. Maybe there are other advanced beings.. Maybe there is not.. As long as they don't be coming tryna free-load like the Aliens we got already.. They be aiiighht!

arlington - May 20, 2026, 3:47 am

STEER MY PLANE, STEER MY PLANE.

Maybe one of our govs has developed superior flight, maybe there's a classified group within a government that hasn't told the rest of the gov, etc.

There are definitely answers that work without needing to think about aliens.

It does appear that several people in the US Gov are saying it's aliens. Specifically, a few whistleblowers throughout the past few years, and a few people in recent weeks have been talking about the supposed 4 species. I don't have any concrete evidence of those, but they say there are 4.

I'm just excited by the physics and propulsion. No matter what's going on, if a ship landed in my driveway i'm asking my wife to come with me as i walk right on that badboy lmao. I'll end up meeting some breakaway civ Nazi, or some dude at Lockheed martin, or yeah, perhaps another species.

My main point I guess is that I can only speak to the outcome, or what we saw. No idea why/where/who. i can only answer "what" and "when" for our sightings. But regardless, I'm excited.
