Thread: [CRYPT service exe/dll native/.net x86/x64 \[DLL sideloading\] SmartScreen bypass](#)

meodollar123 - May 21, 2026, 9:26 am

Magic Crypt

? We can currently crypt most Stealer and spyware (RATs) on the market, such as StealC, KatzStealer, PureStealer, PureRat, etc.

We can currently encrypt x64, x86, and Net4.8 files. We offer two formats: exe and DLL Sideloading, including popular applications such as PDF, Word, Zoom, Winrar, PowerPoint, etc. We can also meet all your requirements; pricing is negotiable.

? We can bypass all security applications on the market. We have great features for your crypt version, such as: Launching two different files simultaneously from two separate strobers, binding PDFs, binding Words... whatever you require, we can fulfill it.

? Price per file: 1 exe file: \$40, DLLSideloading: \$100 (includes all Word, PDF, Installer icons, and special icons only available from us...)

?Each stub has a unique, non-repeating code, making it very difficult for Windows to detect. You can report any discrepancies to us after delivery; if detected, we will exchange or refund you.

?Please contact us at <https://t.me/magicServicecrypt> (We support 24/7)
