Thread: [Aged AWS Accounts \(256v+ Quota\) | Spending History | High RPM Bedrock/AI API](#)

Dane - May 21, 2026, 6:07 pm

Looking to buy premium AWS Account for a high-concurrency project.
Time-wasters and freshly farmed accounts will be ignored.

I need two specific configurations:

TYPE 1:

- Aged AWS Account (Minimum 6+ months active, 1+ year preferred).
- Ec2 vCPU limit: 256v or higher (Spot/On-Demand).
- MUST have clean, verifiable real billing & payment history.

TYPE 2:

- Same specs as Type 1 (Aged, 256v+ vCPU quota, real invoice history).
- Fully unlocked access to Anthropic Claude / AWS Bedrock models.
- API Rate Limits: 10k+ RPM (Requests Per Minute) tier.

TERMS & CONDITIONS:

- Full access required (Root email + IAM Admin + Billing console).

PM me with proof (billing screenshot + quota page), your telegram handle, and your price.
Serious sellers only. High budget for the right setup.
