The Most Expensive Pizza Story Ever ?

A day that many people in the crypto world still remember and celebrate. It's crazy to think how two pizzas became part of Bitcoin history and how much things have changed since then. ?

I wonder if Laszlo Hanyeczv will be having some pizza for today? So, hackers are you celebrating Bitcoin Pizza Day with pizza today? ?

pizza..... strict diet..... :cry:

Edmond Dantes - May 22, 2026, 5:24 am

I might order pizza and pay it with my crypto VCC ?

Lmfao, where the hell do you make these?

I can't believe it's been 16 years since the OG pizza purchase.

Nah, I wish but my dad is grilling some fish and my mother is making chips, so I will eat some homemade food. Maybe tomorrow.

Love pepperoni too :)

You're so lucky to have your Dad and Mom preparing your meals. Maybe you should treat them some pizza tomorrow.?

Another year of reading about this story :P

But lets be honest, how likely are you to have held those bitcoins since the beginning until lets say last bulls peak?

This is truly one of the craziest stories in crypto history. If only he knew what those bitcoins would be worth today?

Can you imagine, having to work a 9-5 everyday living paycheck to paycheck knowing you spent nearly a billion dollars on 2 pizzas ?

Oh yeah if only he can turn back time hahaha That's too much for 2 pizzas, he can have his own pizza shop with those money.

That makes Bitcoin Pizza Day even more perfect for you ? Friday and pizza already go hand in hand.

Can't believe it has been that many years. I do recall coming across Bitcoin back in 2012. Didn't know much about it. Didn't paid much attention to it.

Same here, back then I really didn't think Bitcoin would become this huge someday. I actually exchanged my BTC for cash instead of holding onto them because I thought it was the safer choice and I didn't want the value to suddenly disappear or go to waste ? Looking back now, it's crazy to think how much things have changed over the years.

Moral : Dont waste your crypto on Pizza xD

I got to use Bitcoin properly in 2015. I used it to buy some digital game items then. Didn't know what to do with it or the fact that I could hold it. Back then it was awesome that I could use to to buy games and their items.

Oh yeah, that's how a lot of people saw bitcoin back then ? It was more about using it for fun purchases and games, not really thinking it would become as massive as it is today.

Tbh there weren't many ways to cash it out and it was incredible just to know that you can use this virtual currency instantly to buy digital goods. You didn't even need to open a bank account. Thing felt a technology ahead of time.
