Thread: [US Gov UAP Release #2 - Instant acceleration, orbs that split in two, air/water UAP](#)

Hackers - May 22, 2026, 5:49 am

<https://www.war.gov/UFO/?releaseDate=Release+02#records>

If tranche2 doesn't load in properly, go here: <https://www.war.gov/UFO/>

I am still drinking my coffee and haven't gone through it all.

From what I've been told this week, it will contain a lot of cool things, as well as some possible disinformation or bad info. This is because record releases are being released by keyword & classification levels, so we can expect to see some evidence that is more credible (Apollo, from gov/military, etc) and other reports that might be less credible (statements without imagery).

Please try not to discredit the entire movement because you are able to find 1 doc with less proof than you want (and see Point #1 below!). The whole point of this is to sift through it all and figure out what's most important - similar to how the Epstein files contained thousands of random news reports in forwarded emails, but still had a good % of actual real emails too. This is similar, but luckily less diluted.

46 New videos, new Apollo audio, and more.

Remember this:

1. UAP = Unidentified. If you are expecting 4K clear imagery, that would be identified. Don't be daft.

2. If you see a Banana, you know a banana exists, but not where it came from without a sticker someone placed on it. Remember this analogy when believing evidence and remaining skeptical about the spin/story alongside it. The difference is important. Your views will be challenged in coming months/year & it's important to be open minded, but aware of bad actors or unproven statements that will piggyback off of the disclosure movement. Agendas vary!

[Video: https://www.youtube.com/watch?v=Pct_GXY6ec]

Here's a video from the release. They say it shows UAPs flying in air & then going into water, as transmedium unidentified craft.

In many previous reports, we've heard that UAS or transmedium UAP can enter the water and air without making a splash or disturbing their surroundings, essentially "passing through the water" if you will (according to testimony to congress in the past).

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
