The Department of War's latest batch of files were released today (May 22)

The Pentagon, as promised, has released more documents on UFOs consisting of 64 files ahead of Memorial Day weekend.

Back in February, the president said he'd ordered the secretary of war to release files 'related to alien and extraterrestrial life, unidentified aerial phenomena (UAP), and unidentified flying objects (UFOs), and any and all other information connected to these highly complex, but extremely interesting and important, matters'.

[The first batch was made public on May 8](#), which was made up on 162 files.

Included in the latest documents are six PDF files, seven audio files and 51 video files, [says CBS News](#).

They will only release what they want you to believe and think. We'll never know what's genuine and what isn't.

I want to believe, but I have lost hope in the whole disclosure thing.

All the videos are blurry. Every whistleblower says they are unable to say anything. There is always someone with a book to sell.

I also think most people are getting tired of it, since every new UAP-related event becomes water under the bridge, so to speak.

Dispair... :-(

Just more chicken feed for the government UFO hoax believers.
