Thread: [Looking for solid long-term partners we can help you monetize anything.](#)

Jinbang - May 27, 2026, 5:13 am

We're a large-scale, highly professional team focused on monetizing all kinds of products. You can provide your technical output—whether it's licenses for any kind of product, not limited to games or office software, or even any keys you may have obtained unlawfully.

Our requirements are simple: you must be the original technical source—not your friend, partner, or anyone else acting as a middleman. You also need to give me accurate and complete details. I can accept products with no guarantees, but I can't accept being misled or deceived.

You also need to offer a serious pricing advantage. For one of our product lines, our annual sales volume has reached as high as 200,000 license units, which allows us to stay extremely competitive on pricing against anyone in the market.

We're always looking for partners, but we're never short on low-quality ones. That's why I need someone who can supply consistent volume and maintain stable long-term output. Interruptions create problems for my operations and lower users' expectations of us.

Because we value trust and building a market takes a lot of time and effort, we're looking for partners who are reliable, long-term, and consistent.

Let's go all in and shake up the global market.

This isn't a sales post or a buying request—I'm hoping to find high-quality partners with serious professional capability through this post.
