Professional Developer with 10+ Years Experience — Full Apps Built in Days Using AI

I've been developing software professionally for over 10 years, and now I combine that experience with advanced AI-assisted development workflows to build products extremely fast.

AI doesn't replace experience — it amplifies it.

I use AI tools to accelerate development, iteration, debugging, architecture, UI implementation, and deployment, allowing me to deliver full applications in days instead of months.

What I can build:

- Full-stack web apps
- SaaS MVPs
- AI integrations & automations
- Browser/WebGL games
- Dashboards & admin panels
- APIs & backend systems
- Chrome extensions
- Internal tools & prototypes

Why clients work with me:

- ? 10+ years of real development experience
- ? Extremely fast turnaround times
- ? AI-powered workflow for rapid execution
- ? Can handle full projects independently
- ? Strong focus on shipping working products quickly
- ? Flexible across many tech stacks

If you need a developer who can rapidly turn ideas into production-ready software.

Pricing : 25\$/hr
