I needed a good laugh this morning and i wanted to thank you for that. Hopefully everything stabilizes soon.

My only hope is they get rid of them forever. Ruined the game.

They've been making changes that hurt mostly the high end skins. Prices will naturally stabilize but a few select skins are going to keep their very high prices. Mostly due to rare patterns.

I want to feel bad for people spending fortunes on skins but honestly I cannot. After all this proves that markets of any kind are mostly unpredictable and things can turn upside down anytime.

You got right, people spending a lot of money on pixels that have no real value other than what someone is ready to pay for it.

It's a good thing for my wallet that I never got into playing CS at all. I know damn well I would have spent way too much money on skins lmao.
