Thread: [Strike's AV killer + crypter + DLL sideloading | Bypass UAC, 100+ AV | Fully FUD!](#)

Strike- - May 28, 2026, 11:33 am
Tired of having your malware detected by antivirus software? Looking to bypass them easily on a small budget?

Strike AV Killer + Crypter is here. It can protect files and kill antivirus programs, with support for more than 100 antiviruses.

The stub size is only 200KB, so you won't have the headache of bypassing antivirus software or worrying about the crypter being detected, since the antivirus will be permanently killed.

Also are you looking for custom AV/EDR solutions? We've also got you covered and can bypass them according to your needs.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

shit crypt with shit service.

the free test will get you good response times, then you buy the plan and he tells you its manual crypting through him, he will then ghost you for the rest of the plan and not respond ever when you tell him the crypt is shit.

Hi everyone

I am writing to report some highly suspicious activity regarding the seller of Strike's.

After purchasing the product, the seller has been constantly making excuses to avoid delivering it, repeatedly claiming they are "sleeping" or unavailable. This exact pattern matches a previous scam

on this forum involving another crypter, where the admin later claimed the seller was "arrested" right before the project vanished.

It seems like the exact same playbook is being used here, and I suspect a selective or exit scam is underway. I urge the administration to look into this user and freeze their thread/funds if possible before more users get scammed.

OP respond to the above reports otherwise people that want to buy will sit back and look else where.

No one would sell a killer that works for \$200 a month. A Killer worths \$1000+ at least. He might be using someone else's product. Killer is a very valuable feature there is no legit sellers doing it at this price.

Be careful, test it first and see if it does fit your needs, do not buy before test.

This is my own coded product. I'm selling it at a low price because I'm a new vendor and want to get more reviews before increasing the price.

I also offer a free trial build so you can test it before buying. In some cases, I give the product first, let you test it, and you only pay if you're happy with it.

I can't just make a thread selling an av killer for 500\$+ with no reviews and a new vendor.

I disagree about that, if your work is valuable you must charge the real price, a killer worth more than \$1000.

If you want and I see your product is good I can leave a good feedback.
