They walk among us.

ALIENS.GOV

The White House posted it today.

Let me know your thoughts.

Hackers - May 29, 2026, 10:06 am

OMG ALIENS ARE REAL!?!?!?!?!?!!?!???!?!?!?

Lol /s

Pretty lame waste of the domain, but not surprised. Had a feeling this would happen, and Rep. Luna who is huge in the UAP disclosure movement already called this out as being non-UAP (for illegal immigrants) on May 8th, so it shouldn't be a surprise.

I'm not sure how so many in the UAP movement missed that memo... Seems like lots of people are claiming the UAP disclosure movement is over now (it's not, Batch 3 is coming very soon) because aliens.gov isn't about UAP.

I think that if you target a demographic by race, sex, ethnicity, religion, or place of origin and you forcibly remove them from shelter, coed living, and safety then even if you cause 0 physical harm, you can still be found guilty of genocide under the Genocide Convention laws that are enforced internationally.

I also want to remind people that publicly supporting a genocidal anti-demographic policy can lead to you being found guilty of Incitement of Genocide under the Genocide Convention laws as well.

So, if you are publicly supporting the removal of people based on where they are from, their ethnicity, religion, politics, sex, gender, race, etc then you may be inciting genocide.

I don't make the rules, so please hold the applause, and the hatred. That's international law, not my opinion.

The reason this applies is because there are a high number of cases where people were removed without a legal basis to do so, and even violating federally appointed judge orders.

Genocide laws do not require a death or any physical harm - only mental anguish, removal of shelter/home, removal from coed living (ability to reproduce), etc. This is all happening based on targeted, protected classes, without legal basis. SOME deportations are legal, or perhaps many are, but there are enough cases to make a case against Trump and all supporters of Trump/MAGA to

find them guilty of genocide, and inciting genocide.

Lastly, I want to remind people that I am just autistically in love with the law, ethics, and what makes our country great. Unfortunately many people incorrectly label this as 'TDS' or a political bias.

None of my post here is political because laws that are already written aren't political, they're legal. It would be political to try to change them, or political to ignore them, but it's not political to respect current, valid laws.
