Thread: [Hacker Beginner](#)

Legion_Crack - May 29, 2026, 10:25 pm

Hi. Im beginner. Want to learn quick and good. Any advices? Books, media, programs... anything.

I could buy some access here, but i have no cash or anything. Need something good for free.

Viva anonymous! Viva la liberte!

Sigh....not to shit on you but man this "learn quick" thing is fake. It takes years of learning, practice, testing to get good at anything no matter what it is. And with cyber security (hacking) its constantly changing...so you have to adapt also. You cant adapt if you dont know at the very least the basics. Don't approach it that way man. Your going to fail. 100%.

Best i can say is focus on a specific topic and pursue it. What interests you? Coding: there is like 15 different languages now....Webpage: front end or back end? SQL, HTML, CSS, Java????

There are great FREE resources.... 1. Hackforums.com 2 Tryhackme.com 3. Hackthebox.com 4. learnpython.org

Slow down bud...
