Thread: [Best multicurrency crypto wallet supporting XMR and SUI](#)

7 - May 30, 2026, 3:25 am

Hi, everyone.

I know this might sound dumb I should already know but as the title says I need a good crypto wallet that supports more crypto than exodus and trust is a pain in the ass.

Whats your go too?

Yin Yang - May 30, 2026, 2:35 pm

I use ledger. But I'm not sure if xmr is supported

For OP: GetMonero.org

Run your own Node (don't ever use anyone elses's node).

For Monero just use Feather Wallet. Simple. Note, I use only on desktop, I don't think they have mobile version. IMHO using a mobile device with Monero defeats the privacy aspect of XMR. But if you do need mobile XMR, Cake Wallet is multi-currency and supports it.

And with Sui there is the Slush wallet, version for mobile and web3 extensions.
