Hello,

Looking for people with aged, stripe accounts in good standing within the UK and EU
Ideally accounts with instant payouts are preferred, but any old, used account is eligible.

This is not small work, payouts are large and consistent.

You will earn between 15% - 25% depending on the transaction volume and standing of your account.

Alternatively, you can sell the account completely for between £1000 - £2500 depending on the quality and standing of the account.

Full account ownership transfer and wiping of data will take place to adhere to stripe TOS and GDPR.

Can also work with referrals. Hit me lets work.

Proof of ongoing work below. Account has £4000 instant payout, hence the daily withdrawals from the overall large pending balance.

If you're still looking, shoot a DM. Have several ages accounts with instant payouts and are registered under a legitimate business
