Thread: [How to earn \\$300 a day from Telegram by selling accounts](#)

mohamad123d7 - June 4, 2026, 12:59 am

The method involves buying and selling Telegram accounts in the form of OTP, session, JSON, and Tdata.

However, the best way to buy and sell is via session+json. I will explain the difference to you.

OTP: This is how accounts are bought and sold by sending a number, and then a code is sent, and so on.

session+json: This involves sending Telegram accounts as files, and it's the best and most convenient way to buy and sell.

I will present this method to you for free, even though many people use it. However, there are hidden aspects, bots you can sell to, and large business people.

for example:

I bought 1000 Telegram accounts + 1 US account for \$0.30.

You will sell them to bots for \$0.40 or to businesses for \$0.55. You will earn between \$100 and \$200 from this sale in minutes with no effort. You simply buy the account session files and sell them within minutes, and you will have profited. This is the basic method. The more innovative method involves bots and other methods. I have explained the matter briefly. If anyone has any questions or wants to find suppliers or people to sell to, I will help them for free.

If you want links to bots you buy from, companies that sell to you in large quantities daily, businesspeople, and groups you sell to, with guidance so you can earn \$200 in the same day for \$40

Can you please share from where you bought this?
this will be helpful.
Thanks in advance.

Should have atleast documented it with a contract on HF. Always use a middleman for deals you never know.

Obvious scam. My 5 year old brother could've worked that out. I would be very cautious before dealing

This is scam 100%, if it is so easy and take only few minutes, when you dont do it, why need anyone in this chain? He will just sell you accounts, take your money and thats it...

No, you buy them from bots or individuals.
