[center][SALE] USA eSIM Sales System + Automated Delivery Platform (1 Client Only)[/center]

Note: I am currently working with 1 client actively on a separate project. I have my own personal projects aswell. I will prioritize you along side my current priorities. This means once your set and launch. I will cut back the time I involve myself with your site strictly to what we agreed to, initially this means simply helping ensure inventory and your customer support and assisting in any problems that occur. I will say this now. I am not going to be free for 8 hours a day. My intention is to put about 1 to 2 hours in at most a day until all terms are met and you can run things yourself. This is because it shouldn't take me more then that to handle inventory and assist in any customer issues. Again this will be further discussed. I just want to be clear about what I expect and can put into this realistically. If any concerns please discuss it prior and we can put it into contract.

OVERVIEW

This offering is a complete deployment package for a USA eSIM digital sales system, including automated order handling, payment integration, and delivery infrastructure.

This is a limited engagement (1 client only) to ensure full implementation quality and operational stability.

All terms below are intended to be used as a contractual reference within a formal agreement system (including HF Contracts or equivalent). Final binding terms must be mutually agreed in writing before deployment begins.

SCOPE OF DELIVERY

The package includes:

- Full USA eSIM sales platform (source code)
- Automated order processing system
- Digital eSIM delivery automation
- Fiat payment gateway integration
- Cryptocurrency payment integration
- Deployment-ready backend architecture
- Marketing creatives (ad assets in multiple formats)
- Setup assistance and implementation support
- Operational documentation and workflow guidance

Note: This is a semi-automated system. Inventory management requires operator oversight.

OPERATOR RESPONSIBILITIES

The buyer is responsible for:

- Validating inventory accuracy
- Managing available stock levels
- Uploading inventory into the system
- Running and maintaining advertising campaigns
- Handling customer disputes and chargebacks
- Covering all operational expenses (hosting, ads, processing fees, etc.)

The system automates order flow and delivery once inventory is properly configured.

LIMITED ENGAGEMENT STRUCTURE

This is a single-client engagement. The purpose is to ensure proper setup, stability, and measurable success before full handoff.

Resale, redistribution, or replication of the system or methodology is strictly prohibited without written consent.

PRICING OPTIONS

Option 1 — Fixed Project Fee

- \$2,500 total

Payment structure:

- 50% upfront
- 50% due after delivery completion AND after the first 10 successful sales are processed

Option 2 — Reduced Entry Fee + Revenue Share

- \$1,500 upfront
- 10% revenue share after first 5 completed sales

Payment structure:

- Initial payment upfront
- Remaining payment due after delivery and first 5-10 successful sales
- Revenue share applies post-initial sales threshold

Revenue tracking will be monitored via dashboard access and agreed reporting methods.

DELIVERY TIMELINE

Estimated delivery:

- 4 - 14 days

Timeline may vary depending on:

- Payment processor approval
- Deployment environment
- Integration testing requirements

I can cover costs on setup. This means i can cover the hosting domain and initial marketing campaign launch and any other costs. This doesn't mean anything other then I can cover my expected costs which I limit to no more then \$100 in total. Realistically. I expect to pay

\$15-25 at most for your domain
\$15-25 at most for your hosting setup and first month cost.
\$15-25 at most for your ad campaign 1st day
\$15-25 reserved for anything else I may not be thinking of.

BUYER SUPPORT & ASSISTANCE

Support includes:

- Initial system setup assistance
- Deployment configuration support
- Early-stage operational troubleshooting
- Guidance during first sales cycle

Support is provided during onboarding phase to ensure successful launch and stabilization.

Buyer participation is required during setup and early operations.

RISK & LIABILITY TERMS

The provider is not responsible for:

- Chargebacks or fraudulent customer disputes
- Payment processor fees or penalties
- Advertising spend or campaign losses
- Hosting or infrastructure costs
- Business performance outcomes beyond system functionality

Chargeback mitigation strategies may be discussed and implemented, but cannot be fully guaranteed due to external financial network risks.

Refund handling policies, if any, must be mutually defined and explicitly documented in the contract prior to execution.

REFUND & DISPUTE TERMS

Partial refunds or adjustments may be considered based on:

- Project stage completion
- Operational status of deployed system
- Revenue performance context

All refund conditions must be explicitly agreed in advance. No default refund schedule is assumed.

PAYMENT PROCESSING NOTES

Fiat payment processing is recommended for maximum conversion coverage.

Crypto payment options may be enabled but can reduce customer accessibility depending on

market segment.

Final configuration will be selected based on buyer preference and compliance requirements.

SYSTEM OVERVIEW (HIGH LEVEL)

Workflow:

1. Hosting environment setup (Node.js / Cloudflare Workers supported)
2. Payment gateway configuration
3. Inventory upload and validation
4. Marketing campaign deployment
5. Order automation activation
6. Real-time monitoring and optimization

Recommended starting ad spend (optional guidance):

- \$15–\$25/day initial testing phase

Goal: optimize conversion efficiency and cost-per-sale metrics before scaling spend.

CONFIDENTIALITY & NON-REDISTRIBUTION

The buyer agrees not to:

- Resell the system or its components
- Distribute methodology or source code
- Replicate or repackage the platform for third parties

Violation of this clause terminates support and access rights.

IMPORTANT NOTICE

This system requires active operator involvement. It is not a passive income system.

Success depends on:

- Proper inventory management
- Effective ad execution
- Consistent optimization of campaigns

The system provides automation for execution, not guaranteed financial outcomes.

CONTACT

Serious inquiries only.

Provide details regarding:

- Intended deployment setup
- Payment processing preference
- Expected ad platforms

- Inventory readiness

All terms must be finalized prior to onboarding.
