Thread: [How to cash out my Amazon balance ?](#)

JNath - June 16, 2026, 4:56 am

Guys so I'm getting paid in Amazon gift cards lately and sometimes I receive codes directly from the customers so I have to redeem them instantly just not to get fucked by them. I have \$73 redeemed in my account and I can't seem to take cash out of it. Last year I had few hundreds in my account which I used to buy something for someone on Hackforums and got paid in Crypto but I don't seem to have anyone now.

I tried buying numerous gift cards but Amazon seems to be restricting using my Amazon balance for that. I was wondering what could be some possible ways to cash this balance out ?

List items on eBay, buy items on Amazon and ship to address.

I can't register as a seller from India on eBay without a GST certificate.

You can sell the gift cards, but you won't get full price. I think that Amazon.in has a significant markup over western versions of the site.
